

LEARNING OBJECTIVES

After studying this chapter, you will be able to :

- *describe the need for adjustments while preparing the financial statements;*
- *explain the accounting treatment of adjustments for outstanding and prepaid expenses, accrued and advance receipts of incomes;*
- *discuss the adjustments to be made regarding depreciation, bad debts, provision for doubtful debts, provision for discount on debtors;*
- *explain the concepts and adjustment of manager's commission and interest on capital;*
- *prepare profit and loss account and balance sheet with adjustments.*

In chapter 9, you learnt about the preparation of simple final accounts in the format of trading and profit and loss account and balance sheet. The preparation of simple final accounts pre-supposes the absence of any accounting complexities which are normal to business operations. These complexities arise due to the fact that the process of determining income and financial position is based on the accrual basis of accounting. This emphasises that while ascertaining the profitability, the revenues be considered on earned basis and not on receipt basis, and the expenses be considered on incurred basis and not on paid basis. Hence, many items need some adjustment while preparing the financial statements. In this chapter we shall discuss all items which require adjustments and the way these are brought into the books of account and incorporated in the final accounts.

10.1 Need for Adjustments

According to accrual concept of accounting, the profit or loss for an accounting year is not based on the revenues realised in cash and the expenses paid in cash during that year. There may exist some receipts and expenses in the current year which partially relate to the previous year or to the next year. Also, there may exist incomes and expenses relating to the current year that still need to be brought into books of account. Such items duly adjusted, the final accounts will not reflect the true and fair view of the state of affairs of the business.

For example, an amount of Rs. 1,200 paid on July 01, 2013 towards insurance premium. Any general insurance premium paid usually covers a period of 12 months. Suppose the accounting year ends on March 31, 2014, it would mean that one fourth of the insurance premium is paid on July 01, 2013 relate to the next accounting year 2014-15. Therefore, while preparing the financial statements for 2013-14, the expense on insurance premium that should be debited to the profit and loss account is Rs. 900 (Rs. 1,200 – Rs. 300).

Let us take another example. The salaries for the month of March, 2014 were paid on April 07, 2014. This means that the salaries account of 2013-14 does not include the salaries for the month of March 2014. Such unpaid salaries is termed as *salaries outstanding* which have to be brought into books of account and is debited to profit and loss account along with the salaries already paid for the month of April, 2013 up to February, 2014.

Similarly, adjustments may also become necessary in respect of certain incomes received in advance or those which have accrued but are still to be received. Apart from these, there are certain items which are not recorded on day-to-day basis such as depreciation on fixed assets, interest on capital, etc. These are adjusted at the time of preparing financial statements. The purpose of making various adjustments is to ensure that the final accounts reveal the true profit or loss and the true financial position of the business. The items which usually need adjustments are:

1. Closing stock
2. Outstanding/expenses
3. Prepaid/Unexpired expenses
4. Accrued income
5. Income received in advance
6. Depreciation
7. Bad debts
8. Provision for doubtful debts
9. Provision for discount on debtors
10. Manager's commission
11. Interest on capital

It may be noted that when we prepare the financial statements, we are provided with the trial balance and some other additional information in respect of the adjustments to be made. All adjustments are reflected in the final accounts at two places to complete the double entry. Our earlier example in chapter 9 (Page no. 336) which represents the trial balance of Ankit is reproduced in figure 10.1:

Trial Balance of Ankit as on March 31, 2014

Additional Information : The stock on March 31, 2014 was Rs. 15,000.

Figure 10.1 : Showing the trial balance of Ankit

We will now study about the items of adjustments and you will observe how these adjustments are helpful in the preparation of financial statements in order to reflect the true profit and loss and financial position of the firm.

10.2 Closing Stock

As per the example in chapter 9 (Page no. 336), the closing stock represents the cost of unsold goods lying in the stores at the end of the accounting period. The adjustment with regard to the closing stock is done by (i) by crediting it to the trading and profit and loss account, and (ii) by showing it on the asset side of the balance sheet. The adjustment entry to be recorded in this regard is :

Closing stock A/c	Dr.
To Trading A/c	

The closing stock of the year becomes the opening stock of the next year and is reflected in the trial balance of the next year. The trading and profit

and loss account of Ankit for the year ended March 31, 2014 and his balance sheet as on that date shall appear as follows :

**Trading and Profit and Loss Account of Ankit
for the year ended March 31, 2014**

Dr.		Cr.	
<i>Expenses/Losses</i>	<i>Amount Rs.</i>	<i>Revenues/Gains</i>	<i>Amount Rs.</i>
Purchases	75,000	Sales	1,25,000
Wages	8,000	Closing stock	15,000
Gross profit c/d	57,000		
	1,40,000		1,40,000
Salaries	25,000	Gross profit b/d	57,000
Rent of building	13,000	Commission received	5,000
Bad debts	4,500		
Net profit (transferred to Ankit's capital account)	19,500		
	62,000		62,000

Sometimes the opening and closing stock are adjusted through purchases account. In that case, the entry recorded is as follows :

Closing stock A/c Dr.
 To Purchases A/c

This entry reduces the amount in the purchases account and is also known as *adjusted purchases* which is shown on the debit side of the trading and profit and loss account. In this context, it may be noted, that the closing stock will not be shown on the credit side of the trading and profit and loss as it has been already been adjusted through the purchases account. Not only, in such a situation, even the opening stock will not be separately reflected in the trading and profit and loss account, as it is also adjusted in purchases by recording the following entry:

Purchases A/c Dr.
 To Opening stock A/c

Another important point to be noted in this context is that when the opening and closing stocks are adjusted through purchases, the trial balance does not show any opening stock. Instead, the closing stock shall appear in the trial balance (not as additional information or as an adjustment item) and so also the adjusted purchases. In such a situation, the adjusted purchases shall be debited to the trading and profit and loss account.

The closing stock shall be shown on the assets side of the balance sheet as shown below:

Balance Sheet of Ankit as at March 31, 2014

<i>Liabilities</i>	<i>Amount Rs.</i>	<i>Assets</i>	<i>Amount Rs.</i>
<i>Owners funds</i>		<i>Non-Current Assets</i>	
Capital 12,000		Furniture 15,000

<i>Current Liabilities</i>		Cash 1,000

10.3 Outstanding Expenses

It is quite common for a business enterprise to have some unpaid expenses in the normal course of business operations at the end of an accounting year. Such items usually are wages, salaries, interest on loan, etc.

When expenses of an accounting period remain unpaid at the end of an accounting period, they are termed as *outstanding expenses*. As they relate to the earning of revenue during the current accounting year, it is logical that they should be duly charged against revenue for computation of the correct amount of profit or loss. The entry to bring such expenses into account is :

Concerned expense A/c Dr.
To Outstanding expense A/c

The above entry opens a new account called *Outstanding Expenses* which is shown on the liabilities side of the balance sheet. The amount of outstanding expenses is added to the total of expenses under a particular head for the purpose of preparing trading and profit and loss account.

For example, refer to Ankit's trial balance (refer figure 10.1). You will notice that wages are shown at Rs. 8,000. Let us assume that Ankit owes Rs.500 as wages relating to the year 2013-14 to one of his employees. In that case, the correct expense on wages amounts to Rs. 8,500 instead of Rs. 8,000. Ankit must show Rs. 8,500 as expense on account of wages in the trading and profit and loss account and recognise a current liability of Rs. 500 towards the sum owed to his staff. It will be referred to as *wages outstanding* and it will be adjusted to wages account by recording the following journal entry:

Wages A/c Dr. 500
To Wages outstanding A/c 500

The amount of outstanding wages will be added to wages account for the preparation of the trading and profit and loss account as follows :

**Trading and Profit and Loss Account of Ankit
for the year ended March 31, 2014**

Dr.		Cr.	
<i>Expenses/Losses</i>	<i>Amount Rs.</i>	<i>Revenues/Gains</i>	<i>Amount Rs.</i>
Purchases	75,000	Sales	1,25,000
Wages 8,000	8,500	Closing stock	15,000
Add Outstanding wages 500	56,500		
Gross profit c/d	1,40,000		1,40,000
Salaries	25,000	Gross profit b/d	56,500
Rent of building	13,000	Commission received	5,000
Bad debts	4,500		
Net profit (transferred to Ankit's capital account)	19,000		
	61,500		61,500

Observe carefully the trading and profit and loss account of Ankit. Did you notice the amount of net profit is reduced to Rs. 19,000 on account of outstanding wages. The item relating to outstanding wages will be shown in balance sheet as follows :

Balance Sheet of Ankit as at March 31, 2014

10.4 Prepaid Expenses

There are several items of expense which are paid in advance in the normal course of business operations. At the end of the accounting year, it is found that the benefits of such expenses have not yet been fully received; a portion

10.8 Bad Debts

Bad debts refer to the amount that the firm has not been able to realise from its debtors. It is regarded as a loss and is termed as *bad debt*. The entry for recording bad debt is:

Bad debts A/c	Dr.
To Debtors A/c	

You will notice in Ankit's trial balance, that it contains bad debts amounting to Rs. 4,500. Whereas, the sundry debtors of Ankit are reported as Rs. 15,500. The existence of bad debts in the trial balance signifies that Ankit has incurred a loss arising out of bad debts during the year and which has been already recorded in the books of account.

However, assuming one of his debtors who owed him Rs. 2,500 had become insolvent, and nothing is receivable from him. But the amount of bad debts related to the current year is still to be account for. This fact appears as additional information and is termed as *further bad debts*. The adjustment entry to be recorded for the amount will be as follows. For this purpose, Ankit needs to record an adjustment entry as under :

Bad debts A/c	Dr.	2,500		
To Debtors A/c			2,500	

This entry will reduce the value of debtors to Rs. 13,000(Rs. 15,500 – Rs. 2,500) and increases the amount of bad debts to Rs. 7,000 (Rs. 4,500 + Rs. 2,500).

The treatment of further bad debts in profit and loss account and balance sheet is shown below :

10.9 Provision for Bad and Doubtful Debts

In the above balance sheet, debtors now appears at Rs. 13,000, which is their estimated realisable value during next year. It is quite possible that the whole

It may be noted that the provision created for doubtful debts at the end of a particular year will be carried forward to the next year and it will be used for meeting the loss due to bad debts incurred during the next year. The provision for doubtful debts brought forward from the previous year is called the *opening provision or old provision*. When such a provision already exists, the loss due to bad debts during the current year are adjusted against the same and while making provision for doubtful debts required at the end of the current year is called *new provision*. The balance of old provision as given in trial balance should also be taken into account.

Let us take an example to understand how bad debts and provision for doubtful debts are recorded. An extract from a trial balance on March 31, 2014 is given below :

	Rs.
Sundry debtors	32,000
Bad debts	2,000
Provision for doubtful debts	3,500

Additional Information :

Write-off further bad debts Rs. 1,000 and create a provision for doubtful debts @ 5% on debtors.

In this case, the following journal entries will be recorded :

Date	Particulars	L.F.	Debit Amount Rs.	Credit Amount Rs.
	(a) Bad debts A/c Dr. To Sundry debtors (Further bad debts)		1,000	1,000

10.10 Provision for Discount on Debtors

A business enterprise allows discount to its debtors to encourage prompt payments. Discount likely to be allowed to customers in an accounting year

<i>Liabilities</i>	<i>Amount Rs.</i>	<i>Assets</i>	<i>Amount Rs.</i>
<i>Owners Funds</i>		<i>Non-Current Assets</i>

		Closing stock 15,000	15,000
	<u>56,123</u>		<u>56,123</u>

In the subsequent year, the discount will be transferred to the provision for discount on debtors account. The account will be treated in the same manner as the provision for doubtful debts.

10.11 Manager's Commission

The manager of the business is sometimes given the commission on the net profit of the company. The percentage of the commission is applied on the profit either *before charging such commission* or *after charging such commission*. In the absence of any such information, it is assumed that commission is allowed as a percentage of the net profit before charging such commission.

Suppose the net profit of a business is Rs. 110 before charging commission. If the manager is entitled to 10% of the profit before charging such commission, the commission will be calculated as :

$$= \text{Rs. } 110 \times \frac{10}{100} = \text{Rs. } 11$$

In case the commission is 10% of the profit after charging such commission, it will be calculated as :

$$= \text{Profit before commission} \times \text{Rate of commission} / (100 + \text{commission})$$

$$= \text{Rs. } 110 \times \frac{10}{110} = \text{Rs. } 10.$$

The managers commission will be adjusted in the books of account by recording the following entry :

Profit and loss A/c Dr.
 To Manager's commission A/c

Let us recall our example and assume that Ankit's manager is entitled to a commission @ 10%. Observe the following profit and loss account if it is based on :

- (i) amount of net profit before charging such commission
- (ii) amount of profit after charging such commission.

10.12 Interest on Capital

Sometimes, the proprietor may like to know the profit made by the business after providing for interest on capital. In such a situation, interest is calculated at a given rate of interest on capital as at the beginning of the accounting year. If however, any additional capital is brought during the year, the interest may also be computed on such amount from the date on which it was brought into the business. Such interest is treated as expense for the business and the following journal entry is recorded in the books of account:

Interest on capital A/c	Dr.
To Capital A/c	

In the final accounts, it is shown as an expense on the debit side of the profit and loss account and added to capital in the balance sheet.

Let us assume, Ankit decides to provide 5% interest on his capital. This shall amount to Rs. 600 for which the following journal entry will be recorded:

Interest on capital A/c	Dr.	600
To Capital A/c		600

This implies that net profit shall be reduced by Rs. 600. As a result, the reduced amount of profit shall be added to the capital in the balance sheet.

But, when interest on capital shall be added to the capital, this effect shall be neutralised. As shown below :

	Rs.
Capital	12,000
Add Profit	<u>17,961</u>
	29,961
Add Interest on capital	<u>600</u>

Summary with Reference to Learning Objectives

- 1 *Need for adjustments* : For the preparation of financial statements, it is necessary that all the adjustments arising out of the accrual basis of accounting are made at the end of the accounting period. Another important consideration in the preparation of final accounts with adjustments, is the distinction between capital and revenue items. Entries which are recorded to give effect to these adjustments are known as adjusting entries.
- 2 *Outstanding expenses* : At the end of the accounting period sometimes a business enterprises is left with some unpaid expenses due to one reason or another. Such expenses are termed as outstanding expenses.

3. *Prepaid expenses* : At the end of the accounting year, it is found that the benefits of some expenses have not been fully received; a portion of total benefits would be received in the next accounting year. That portion of the expense, the benefit of which will be received during the next accounting period is known as 'prepaid expenses'.
4. *Accrued Income* : These are certain items is received by a business enterprise but the whole amount of it does not belong to the next period. Such portion of income which belongs to the next accounting period is income received in advance and is known as "unearned income".
5. *Depreciation* : Depreciation is the decline in the value of an asset an account of wear and tear or passage of time or with. It actually amounts to writing off a portion of the cost of an asset which has been used in the business for the purpose of earning profits. In the balance sheet, the asset is shown at loss minus the amount of depreciation.
6. *Provisions for bad and doubtful debts* : It is a normal feature of business operations that some debts prove irrecoverable which means that the amount to the realised from them becomes had to view of this. An attempt is made to bring in a certain element of certainty in the amount in respect of bad debts charged every year against incomes.
