Answer the following comprehension 1 and II

- i. I consider myself something of an authority on apologies, because a quick temper has provided me with plenty of opportunities to make them. In one of my earliest memories, my mother is telling me, Don't look at the ground when you say, 'I'm sorry'. 'Hold your head up and look the person in the eye, he'll know you mean it.

My mother thus conveyed the first principle of successful apology: it must be direct. you must never pretend to be doing something else. you do not leaf through a sheaf of correspondence while apologizing to a subordinate after blaming her for a mistake that turned out be your fault. you do not apologize to a hostess, whose guest of honour you insulted, by sending flowers the next day without having mentioned your behaviour.

51. According to the author's mother, the best way to apologize is

 - 2) he has read many books on how to apologize
 - 3) he has apologized many a time
 - 4) he has been offered apologies in many ways

- ii. we stumbled slowly along in the darkness, with the back loom of the craggy hills around us, and the yellow speck of light burning steadily in front. there is nothing so deceptive as the distance of a light upon a pitch-dark night, and sometimes the glimmer seemed to be far away upon the horizon, and sometimes it might have been within a few yards of us. but at last we could see whence it came, and then we know that we were very close.
