HISTORY, CIVICS AND GEOGRAPHY (50)

GEOGRAPHY

H.C.G. - Paper - 2

Aims:
1. To develop an understanding of terms, concepts and principles related to Geography.
2. To explain the cause-effect relationships of natural phenomena.
3. To understand the use of natural resources and development of regions.
4. To acquire knowledge of and appreciate the interdependence of nations and different regions of the world.
5. To know the availability of resources, understand, explain their uses and appreciate the problems of development in India.
6. To understand and encourage human efforts made to conserve and protect the natural environment.
7. To acquire practical skills related to the meaning and use of maps and their importance in the study of Geography.

CLASS IX

There will be one paper of two hours duration carrying 80 marks and Internal Assessment of 20 marks.

The question paper will consist of Part I and Part II.

Part I (compulsory) will consist of two questions.

Question 1 will consist of short answer questions from the entire syllabus and Question 2 will consist of a question based on World Map.

Part II. Candidates will be required to choose any five questions.

Candidates will be expected to make the fullest use of sketches, diagrams, graphs and charts in their answers.

Questions may require answers involving the interpretation of photographs of geographical interest.

PRINCIPLES OF GEOGRAPHY

1. Our World
   (i) Earth as a planet
   Shape of the earth. Earth as the home of humankind and the conditions that exist.
   (ii) Geographic grid - Latitudes & Longitudes
   (a) Concept of latitudes: main latitudes, their location with degrees, parallels of latitude and their uses. (b) Concept of longitudes - Prime Meridian, time (local, standard and time zones, Greenwich Mean Time (GMT) and International Date Line (IDL). Eastern and Western hemisphere. (c) Using latitudes and longitudes to find location. Calculation of time. (d) Great Circles and their use.

2. Structure of the Earth
   (i) Earth’s Structure
   Core, mantle, crust – meaning, extent and their composition.
   (ii) Landforms of the Earth
   Mountains, plateaus, plains (definition, types and their formation):
   Mountains – fold, residual and block.
   Plateaus – intermont and volcanic.
   Plains – structural and depositional.
   Examples from the world and India.
   (iii) Rocks - difference between minerals and rocks, types of rocks: igneous, sedimentary, metamorphic, their characteristics and formation; rock cycle.
   (iv) Volcanoes
   Meaning. Types – active, dormant and extinct.
   Effects – constructive and destructive.
   Important volcanic zones of the world.
   (v) Earthquakes
Meaning, causes and measurement.
Effects: destructive and constructive.
Earthquake zones of the World

(vi) Weathering and Denudation
Meaning, types and effects of weathering.
Types: Physical Weathering – block and granular disintegration, exfoliation;
Chemical Weathering– oxidation, carbonation, hydration and solution;
Biological Weathering – caused by humans, plants and animals.
Meaning and agents of denudation; work of river and wind.
Stages of a river course and associated land forms – V-shaped valley, waterfall, meander and delta.
Wind – deflation hollows and Sand dunes.

3. Hydrosphere
Meaning of hydrosphere.
Tides - formation and pattern.
Ocean Currents – their circulation pattern and effects. (Specifically of Gulf Stream, North Atlantic Drift, Labrador Current, Kuro Shio and Oya Shio.)

4. Atmosphere
(i) Composition and structure of the atmosphere.
Troposphere, Stratosphere, I onosphere and Exosphere; Ozone in the Stratosphere, its depletion. Global warming and its impact.
(ii) Insolation
- Meaning of insolation and terrestrial radiation.
- Factors affecting temperature: latitude, altitude, distance from the sea, slope of land, winds and ocean currents.
(iii) Atmospheric Pressure and Winds.
- Meaning and factors that affect atmospheric pressure.
- Major pressure belts of the world.
- Factors affecting direction and velocity of wind – pressure gradient, Coriolis Effect.
- Permanent winds – Trades, Westerlies and Polar Easterlies.

5. Pollution
(a) Types - air, water (fresh and marine), soil, radiation and noise.
(b) Sources
- Noise: Traffic, factories, construction sites, loud speakers, airports.
- Air: vehicular, industrial, burning of garbage.
- Water: domestic and industrial waste.
- Soil: chemical fertilizers, bio medical waste and pesticides.
- Radiation: X-rays; radioactive fallout from nuclear plants.
(c) Effects - on the environment and human health.
(d) Preventive Measures
Car pools, promotion of public transport, no smoking zone, restricted use of fossil fuels, saving energy and encouragement of organic farming.

6. Natural Regions of the World
Location, area, climate, natural vegetation and human adaptation.
Equatorial region, Tropical grasslands, Tropical Deserts, Tropical Monsoon, Mediterranean, Temperate grasslands, Taiga and Tundra.
7. Map Work

On an outline map of the World, candidates will be required to locate, mark and name the following:

1. The major Natural Regions of the world - Equatorial, Tropical Monsoon, Tropical Deserts, Mediterranean type, Tropical grasslands, Temperate grasslands, Taiga and Tundra.

2. The Oceans, Seas, Gulfs and Straits - all Major Oceans, Caribbean Sea, North Sea, Black Sea, Caspian Sea, South China Sea, Mediterranean Sea, Gulf of Carpentaria, Hudson Bay, Persian Gulf, Gulf of Mexico, Gulf of Guinea, Bering Strait, Strait of Gibraltar, Strait of Malacca.

5. Plateaus – Canadian Shield, Tibetan Plateau, Brazilian Highlands, Patagonian Plateau, Iranian Plateau, Mongolian Plateau.

PRACTICAL WORK / PROJECT WORK

1. A record file having any three of the following exercises will be maintained. (The file will be evaluated out of 10 marks).

(a) Uses of important types of maps.

(b) Directions and how to identify them - an illustrative diagram.

(c) Reading and using statement of scale, graphic scale and scale shown by representative fraction method. (No drawing work, only explaining their meanings).

(d) Reading of one town guide map or an atlas map. (Recognising the symbols and colours used, identifying directions and distances).

(e) Drawing and recognising forms of important contours viz. valleys, ridges, types of slopes, conical hill, plateau, escarpment and sea cliff.

(f) Drawing at least one sketch map to organize information about visiting an important place, a zoo or a monument.

2. Candidates will be required to prepare a project report on any one topic. The topics for assignments may be selected from the list of suggested assignments given below. Candidates can also take up an assignment of their choice under any of the four broad areas given below. (The project will be evaluated out of 10 marks).

Suggested list of Assignments:

(a) Weather records: Maintaining and interpreting weather records as found in the newspaper for at least one season.

(b) Collection of data from secondary sources (Using Modern techniques i.e GPS, Remote Sensing, Aerial Photography and Satellite imageries): Preparing a PowerPoint presentation on current issues like – use of earth resources/development activities/dangers of development and ecological disasters like droughts, earthquakes, volcanoes, floods, landslides cyclones and tornadoes in the world.

(c) Physical Features: Collection of data from primary and secondary sources or taking photographs and preparing notional sketches of features found in the vicinity or areas visited during the year as a part of school activity.

(d) Find out the sources of pollution of water bodies in the locality and determine the quality of water.

(e) Collect information on global environmental issues and problems and communicate your findings through appropriate modes (posters, charts, collages, cartoons, handouts, essays, street plays and PowerPoint presentation).

(f) Area Studies: Choosing any aspect from Section B (World Studies) and preparing a PowerPoint presentation or a write up on it.

(g) Meteorological Instruments and their uses – Six’s maximum and minimum thermometer, mercury barometer, aneroid barometer, wind vane, anemometer, rain gauge and hygrometer.
## INTERNAL ASSESSMENT IN GEOGRAPHY - GUIDELINES FOR MARKING WITH GRADES

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Preparation</th>
<th>Procedure/Testing</th>
<th>Observation</th>
<th>Inference/Results</th>
<th>Presentation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grade I  (4 marks)</td>
<td>Gives complete theoretical information using relevant geographical terms</td>
<td>States the objectives and defines the aspects to be studied.</td>
<td>Studies text and source material and makes a list.</td>
<td>States theoretical information in a coherent and concise manner using geographical terminology. Uses a variety of techniques. Shows resourcefulness. Supports investigation with relevant evidence.</td>
<td>Neatly and correctly stated statement of intent and conclusion matches with objectives.</td>
</tr>
<tr>
<td>Grade II (3 marks)</td>
<td>Provides adequate information using appropriate terms.</td>
<td>States objectives but not the limitations of the study.</td>
<td>Makes a limited list of source material only from secondary sources.</td>
<td>Uses sound methodology—using methods suggested. Makes a valid statement about the data collected. Attempts to develop explanations using available information.</td>
<td>Limited use of reference material and a presentation, which is routine.</td>
</tr>
<tr>
<td>Grade III (2 marks)</td>
<td>States objectives using some geographical terms but mostly in descriptive terms.</td>
<td>Only lists the aspects to be studied.</td>
<td>References are minimal.</td>
<td>Uses methodology in which selective techniques are applied correctly. Makes descriptive statement. Analysis is limited. Relates and describes systematically the data collected. Tries to relate conclusion to original aim.</td>
<td>Simple and neat with correct placement of references, acknowledgements, contents, maps and diagrams.</td>
</tr>
<tr>
<td>Grade IV (1 mark)</td>
<td>States intent without using relevant geographical terms but explaining them correctly.</td>
<td>Shows evidence of what to look for and how to record the same.</td>
<td>Uses methodology with some techniques but is unable to systematically record data and collect information.</td>
<td>Makes few relevant statements. Does analyze data that is not presented or tends to copy analysis available from other sources. Makes superficial conclusions. Link between the original aim and conclusion is not clear.</td>
<td>Neat but lacking in correct placement of table of contents, maps, diagrams and pictures.</td>
</tr>
<tr>
<td>Grade V (0 marks)</td>
<td>Does not make any use of geographical terms.</td>
<td>Has not collected any relevant data and has not presented sources correctly.</td>
<td>Does not use any logical technique and does not follow the methodology suggested.</td>
<td>Does not analyze data. Does not use the suggested methods. Makes conclusions but does not relate them to the original aim.</td>
<td>Presents the report without reference.</td>
</tr>
</tbody>
