5. Which of the following leaves have reticulate venation?

Wheat, tulsi, maize, grass, coriander (dhania), China rose

Solution:

Tulsi, China rose and coriander have reticulate venation.

6. If a plant has fibrous root, what type of venation do its leaves have?

Solution:

If a plant has fibrous root, its leaves have **parallel venation**.

7. If a plant has leaves with reticulate venation, what kind of roots will it have?

Solution:

If a plant has leaves with reticulate venation, it will have **tap root**.

8. Is it possible for you to find out whether a plant has taproot or fibrous roots by looking at the impression of its leaf on a sheet of paper?

Solution:

Yes it is possible to find whether a plant has taproot or fibrous roots by looking at the impression of its leaf on a sheet of paper.

9. What are the parts of a flower?

Solution:

- a) Sepals
- b) Petals
- c) Stigma
- d) Style
- e) Anther
- f) Androecium
- g) Gynoecium

10. From the following plants, which of them have flowers?

Grass, maize, wheat, chilli, tomato, tulsi, peepal, shisham, banyan, mango, jamun, guava, pomegranate, papaya, banana, lemon, sugarcane, potato, groundnut

Solution:

Chilli, Tomato, Tulsi, Mango, pomegranate, Lemon, Jamun, Guava, papaya, banana

11. Name the part of plant which produces food. Name the process.

Solution:

Leaves produce food through a process called as Photosynthesis.

12. In which part of a flower, you will find the ovary?

Solution:

Ovary is found in lowermost and swollen parts of the pistil.

13. Name two plants in which one has joined sepals and the other has separate sepals.

Solution:

Plants with joined sepals- Rose, Lotus

Plants with separate sepals- China rose, Mustard flower
