

An Essay on My Dream for Class 3

- Everyone has a dream to achieve in his/her life.
- Some people dream of becoming rich, some want to become famous and some want to make others' lives better by helping them.
- My dream is to become a scientist. It is not an easy-to-achieve goal. But I know I can do it.
- My inspiration is Dr A P J Abdul Kalam. He was an aerospace scientist.
- Science always entices me. There are so many exciting things to learn in it.
- I enjoy reading science books on natural processes, inventions, discoveries, plants, animals, human beings, chemical reactions, etc.

- Scientists solve global challenges, make innovations and they get to learn new things every now and then.
- When I become a scientist, I want to help society through my revolutionary ideas.
- There are so many issues including pollution and global warming. I want to innovate such devices which help the world in eradicating such problems.
- My parents and teachers always motivate me to study well and passionately work towards achieving my dream.
