### Three steps to minimize the environmental degradation caused by industrial development in India are –

Every liter of waste water discharged by our industry pollutes eight times the quantity of fresh water.

1. **Minimizing use of water for processing by Reusing and Recycling it in two or more successive stages.**
2. **Harvesting of rain water to meet water requirements.**
3. **Treating hot water and effluents before releasing them in rivers and ponds.**
4. **Particulate matter in the air can be reduced by fitting smoke stacks to factories with electrostatic precipitators, fabric filters, scrubbers and inertial separators.**
5. **Smoke can be reduced by using oil or gas instead of coal in factories.**
6. **Machinery and equipments can be used and generators should be fitted with silencers.**
7. **Almost all machineries can be redesigned to increase energy efficiency and reduce noise.**
8. **Any other relevant measure.**

### Popular Struggle of Bolivia

People’s struggle against privatization of water in Bolivia proves that struggles are integral part of Democracy.

The World Bank pressurized the government to give up its control of municipal water supply. The government sold these rights to a multinational company which increased the price of water by four times. Many people received monthly water bill of Rs 1000/- in a country where average income is around 5000/- a month.

In January 2000, a new alliance of labour human rights and community leaders organized a successful four day strike.

The government agreed to negotiate and the strike was called off.

The police resorted to brutal repression when the agitation started in February, followed in April and the government imposed martial law.

But the power of people forced the officials of the MNC to flee the city and made the government concede to all the demand of the protestors.

The contract with MNC was cancelled and the water supply was restored with the Municipality at old rates.

This popular struggle came to be known as “Bolivia’s Water War.”
