

## Chapter 10 Law & Social Justice

**1. Talk to two workers (For example, construction workers, farm workers, factory workers, workers at any shop) to find out if they are receiving the minimum wages laid down by law.**

**Answer:** Students have to do this by themselves.

**2. What are the advantages to foreign companies in setting up production in India?**

**Answer:** The advantages to foreign companies in setting up their production in India is as follows:

1. foreign companies come to India because of cheap labour. Wages that the companies pay to workers in foreign countries are far higher than what they have to pay to workers in India.
2. Low wages and longer hours of work.
3. Minimum additional expenses such as for housing facilities for workers Thus, companies can save costs and earn higher profits.
4. Cost cutting can also be done by other more dangerous means like lower working conditions including lower safety measures are used as ways of cutting costs

**3. Do you think the victims of the Bhopal gas tragedy got justice? Discuss.**

**Answer:** The victims of the Bhopal gas tragedy got some monetary compensation but justice. It was caused due to gross neglect of safety measures by the factory management. The government represented people to claim compensation for affected ones. The government demanded 3 billion dollar as compensation of which the company compensated only 470 million dollars. Today, after so many tears of the tragedy, there are people seeking justice. They still fail to avail safe drinking water, healthcare facilities and jobs for the people. Many people who were maimed for life have no use for the compensation money. Hence, it can be said that the victims of the Bhopal gas tragedy did not get justice.

**4. What do we mean when we speak of law enforcement? Who is responsible for enforcement? Why is enforcement so important?**

**Answer:** Law enforcement means implementation of law. Government is responsible for enforcement. Enforcement is important when the law seeks to protect the people belonging to the weaker section from those who are strong and powerful, to ensure that every worker gets fair wages, when workers are poor or powerless, the fear of losing future earnings or facing reprisals forces them to accept low wages. Employers use this as a tool to pay workers less than the fair wage. In such cases, it is crucial that laws are enforced.

**5. How can laws ensure that markets work in a manner that is fair? Give two examples to support your answer.**

**Answer:** Laws ensure that markets work in a fair manner by protecting the people from unfair practises. The two examples are

Child Labour Prevention Act: This law states that no child below the age of 14 years shall be employed to work in any factory or mine or engage in any other hazardous employment.

Right against Exploitation: This law states that no one can be forced to work for low wages or under bondage.

The government has also passed laws to make sure that essential products such as kerosene, food grain, sugar etc are not highly priced. It is imperative to impose such restrictions on people who are marketing these types of products so that people of low strate can afford these goods.

**6. Imagine yourself to be a worker working in a chemical factory, which has received orders from the government to move to a different site 100 kms away from the present location. Write about how your life would change? Read out your responses in the classroom.**

**Answer:**

**7. Write a paragraph on the various roles of the government that you have read about in this unit.**

**Answer:** The government plays following roles:

1. Providing public facilities like healthcare, sanitation and water supply and ensures that these are not overtaken by the private enterprises.
2. Enforcing law against child labour.
3. Fixing minimum wages for workers and revising it from time to time.
4. Enforcing laws regarding safety at the workplace.
5. Enforcing laws regarding the safety of environment.
6. Protecting the interests of consumers against overpricing and standard products.
7. Punishing organisations who do not follow policies to protect environment against pollution.

**8. What are the sources of environmental pollution in your area? Discuss with respect to (a) air; (b) water and (c) soil. What are the steps being taken to reduce the pollution? Can you suggest some other measures?**

**Answer:** The various sources of environment pollution in our area are as follow:

(a) Smoke of factories petrol and diesel vehicles is the main reason due to which air gets polluted.

(b) The main cause of water pollution is chemical fertilizers and garbage from factories, farms and houses.

(c) Soil is polluted by the pesticides and fertilisers used to grow crops or by garbage dumped by human and factory waste.

Steps taken to reduce these pollution are:

various laws have been enforced to keep a check on the environment pollution.

Promotion of CNG vehicles to reduce air pollution.

Strict actions against companies who violate environmental laws.

No rules or laws can help make our environment clean and free of pollution until and unless every individual of the society takes the responsibility on his part to keep their environment clean. Only voluntary actions can make our environment pollution free.

**9. How was environment treated earlier? What has been the change in perception? Discuss.**

**Answer:** The environment was treated as a 'free' entity and any industry or individual could pollute the environment without any restrictions. There were very few laws to protect and conserve the environment in India. Government also paid no attention to safeguarding the environment.

Now there has been a change in perception. Government has introduced various laws to protect and conserve the environment such as Swachh Bahrat Abhiyan. The courts have given a number of judgments upholding the right to a healthy environment as intrinsic to the fundamental right to life.

Various laws and procedures check pollution, clean rivers. The government can also impose fine to those who pollute our precious environment.
