## PREFACE

The Textbook Society, Karnataka has been engaged in producing new textbooks for Standards I to X since 2010. These books have been prepared according to the new syllabi which in turn are designed on NCF 2005 and KCF 2007. Textbooks are prepared in 12 languages, and seven media.

In view of the low standard of attainment of Kannada medium students in English, the Government of Karnataka introduced English from standard I in the year 2007. A series of books were prepared and they have been in use ever since. With the introduction of the new textbooks in all subjects, the Government decided to replace these books and the new books prepared now satisfy the redefined objectives of NCF 2005. The new objectives are-

- connecting knowledge to life activities
- learning to shift from rote methods
- enriching the curriculum beyond textbooks
- learning experiences for the construction of knowledge by learners
- making education relevant to the present and future needs.

The new books are called Practice Books. Children learn spoken English through activities relating to their immediate environment and personal experiences. The books are full of attractive pictures in four colours. These pictures represent objects which the learners encounter in their life around them. Learners begin learning English by naming objects to begin with and then use them in sentences. In the early stages, a lot of importance is given to fluent communication in the spoken form.

The emphasis gradually shifts to learners using language to express their needs, feelings and emotions (notions and function) in the simplest possible form. Then come simple stories which they listen to and enjoy. Telling stories by the learners and simple conversations follow.

Then they begin to read pictures, words and simple sentences off the black board and from the Reader. The learners are slowly introduced to writing the letters of the English alphabet by the end of Standard I. This process continues in Standard II and by the end of the second year it is hoped that learners should be able to read the materials given in the Practice Book.

There is not going to be the Teachers Source Book as we used to have for the earlier package of Practice Books. All the instructions are given in the Practice Book itself (For example 'Word to the teacher :- ask the pupils to name the dresses and make them repeat the same' etc.

In books for classes I and II a number of Rhymes are included to help learners master the rhythm of the language. The rhymes are very simple and children enjoy saying these rhymes after the teacher.

Listening to stories begins half way through I year and continues throughout the course (four years). In class I the teachers may use a bit of the learner's mother tongue and reduce the use of it gradually. Let the children use English. Do not insist on grammatical accuracy to begin with. Let the learners feel confident that they can speak English like any others.

The Textbook Society expresses grateful thanks to the chairpersons, writers and scrutinizers for their sincere efforts in preparing the books and making them interesting.

### CHAIRPERSON'S NOTE

The second English Activity Book is aimed at familiarizing pupils with English in both its written and spoken forms. As the name suggests, this is an activity book and not a textbook with a set syllabus. By saying rhymes, singing songs, listening to stories and by colouring and drawing, children will become familiar with the language and so comfortable with English. The focus in this book is on listening and speaking; the reading is mainly picture reading and writing is limited to tracing and copying.

Spaced, controlled and meaningful repetition helps children to fix language patterns in their minds. We have suggested that you do this with words and rhymes. Colours are important to children get them to do the colouring activities and make it an enjoyable experience. Seeing the shape of words, tracing and drawing helps a child's motor skills. Give them enough time to do this. Above all, do not be anxious about 'finishing' the portion! One academic year is sufficient to do the activities in the book at an easy pace.

We would like your observations and comments about your teaching experience with this activity book. It will help us to incorporate changes, if possible in the next edition. You could write to

Ms Shobha M.B. Co-ordinator, Karnataka Textbook Society,

I would like to thank all the persons involved in the production of this book. My special thanks and acknowledgement to Ms Indira Pastala of Bombay, a teacher and a great writer of children's stories, for allowing us to use her story: Scratch my back.

We enjoyed putting together this activity book I hope you enjoy using it.

Happy teaching !

## About the Revision of Textbooks

Honourable Chief Minister Sri Siddaramaiah who is also the Finance Minister of Karnataka, in his response to the public opinion about the New Textbooks from standard one to ten, announced, in his 2014-15 budget speech of constituting an expert-committee, to look into the matter. He also spoke of the basic expectations there in, which the Textbook experts should follow: “ The Textbooks should aim at inculcating social equality, moral values, development of personality, scientific temper, critical acumen, secularism and the sense of national commitment”, he said.

Later, for the production of the Textbooks from class one to tenth, the Department of Education constituted twenty seven committees and passed an order on 24-11-2014. The committees so constituted were subject and class-wise and were in accordance with the standards prescribed. Teachers who are experts in matters of subjects and syllabi were in the committees.

There were already many complaints and analyses about the Textbooks. So, a freehand was given in the order dated 24-11-2014 to the responsible committees to examine and review text and even to prepare new text and revise if necessary. Eventually, a new order was passed on 19-9-2015 which also give freedom even to re-write the Textbooks if necessary. In the same order, it was said that the completely reviewed Textbooks could be put to force from 2017-18 instead of 2016-17.

Many self inspired individuals and institutions, listing out the wrong information and mistakes there in the text, had send them to

the Education Minister and to the Textbook Society. They were rectified. Before rectification we had exchanged ideas by arranging debates. Discussions had taken place with Primary and Secondary Education Teacher Associations'. Questionnaires were administered among teachers to pool up opinions. Separate meeting were held with teachers, subject inspectors and DIET Principals. Analytical opinions had been collected. To the subject experts of science, social science, mathematics and languages, textbooks were sent in advance and later meeting were held for discussions. Women associations and science related organisation were also invited for discussions. Thus, on the basis of all inputs received from various sources, the textbooks have been revised where ever necessary.

Another very important thing has to be shared here. We constituted three expert committees. They were constituted to make suggestions after making a critical study of the text of science, mathematics and social science subjects of central schools (N.C.E.R.T), along with state textbooks. Thus, the state text books have been enriched basing on the critical analysis and suggestions made by the experts. The state textbooks have been guarded not to go lower in standards than the textbooks of central school. Besides, these textbooks have been examined along side with the textbooks of Andhra, Kerala, Tamil Nadu and Maharashtra states.

Another clarification has to be given here. Whatever we have done in the committees is only revision, it is not the total production of the textbooks. Therefore, the forms of already prepared textbooks have in no way been affected or distorted. They have only been revised in the background of gender equality, regional representation, national integrity, equality and social harmony. While doing so, the curriculum frames of both central and state have

not been transgressed. Besides, the aspirations of the constitution are incorporated carefully. Further, the reviews of the committees were once given to higher expert committees for examination and their opinions have been effected into the textbooks.

Finally, we express our grateful thanks to those who strived in all those 27 committees with complete dedication and also to those who served in higher committees. At the same time, we thank all the supervising officers of the Text book Society, who sincerely worked hard in forming the committees and managed to see the task reach it's logical completion. We thank all the members of the staff who co-operated in this venture. Our thanks are also due to the subject experts and to the associations who gave valuable suggestions.

### The elephant and the dog

Long long ago there was a king. The king had an elephant. An elephant trainer looked after the elephant. The trainer had a dog. The dog and the elephant were friends. They ate together, they played together.

The trainer needed money: so, he sold the dog to a rich man. The dog did not want to leave his friend, the elephant, but he had to go with his new master. From that day on the elephant stopped eating and would not bathe.

"The elephant is ill," said everyone. The doctor was called. "He is not ill," the doctor said, "He is lonely, he needs a friend." "Who has taken his friend away? Who has taken the dog away?" the king asked. "Punish that man."

The rich man who had the dog became afraid. He set the dog free. The dog ran out of the rich man's house. He ran as fast as he could to the elephant. Both the elephant and dog were now happy. They played together once again.

Neat little clock

There's a neat little clock  
In the school room it stands  
And it points to the time

To do what is right.

### The Foolish Frog

A baby frog once saw an ox grazing in a field. He was surprised to see such a big animal. "What a huge god - like creature this is," he murmured.

He ran to his father, and said excitedly, "Papa, papa, I've seen a big animal! It is huge. I've never seen such a big animal!"

The big frog was not happy to hear this. He breathed deep and swelled his body.

"Was that animal this big?"

"No, it was bigger."

He took a bigger breath and stretched his skin.

"Now am I bigger than that fellow?"

"No, papa. He was much bigger."

Tansen was a great singer from Gwalior. He was one of the navaratnas, the nine talented people, in the court of Akbar.

Once Akbar asked Tansen to sing Raag Deepak for him. Tansen said that if he sang Raag Deepak, lamps would light up, but he would also fall sick. Akbar refused to listen to any explanation. He wanted Tansen to sing.

So Tansen trained Rupa, another singer, to sing Raag Megh. Raag Megh would cause rain. When Tansen began singing Raag Deepak, lamps lit up, water evaporated from rivers. Flowers died. Tansen became weak.
