ENVIRONMENTAL STUDIES

STANDARD TWO

TERM III
Shall we complete the poem?

When the air blew,
   The windows opened!
As windows opened,
   The papers flew!

When the air blew,
   The trees swayed!
As trees swayed,
   The leaves withered!

When the air blew,
   The clothesline glide!
As clothesline glide,
   The clothes dried!

When the air blew,
   ___________________
   ___________________

   ___________________
Look at the picture and answer.

- Why do coconut leaves move?
- Why do kites fly?
- What is filled in the balloon?
- Why do the blades of the windmill rotate?

Air is present all around us.  
We cannot see air.  
We can feel air.
Plants, animals and man need air for breathing.

- Inhaling and exhaling of air through the nose is called breathing.
- We should breathe to live. Air is essential for breathing.
Bubbles are coming out from the mouth of the fish. Do you know why?

Shall we know the speed of Air!

Look at the pictures and number them 1, 2, 3.. based on the speed of air that forced the trees to bend.

- Air moving slowly and gently is called breeze.
- Air moving strongly is called storm.
- Very strong wind is called gale.
Shall we know the direction of the wind?

Blow a balloon. Tie it and allow it to fly in the air. The direction in which it flies shows the direction of the wind.

Mark ✅ for the right action and ❌ for the wrong action.
Fill in the blanks choosing the right choice.

Football is filled with ____________
(air / water)

The direction in which the kite flies is ____________
(the direction of wind / opposite to the direction of the wind)

Inhaling and exhaling air through the nose is known as ____________
(Respiration / Digestion)

____________ is produced from the windmill.
(Electricity / Light)

____________ is helpful for candle to burn.
(Gentle breeze / Strong wind)
Shall we make a fan!

- Take a paper.
- Draw a picture that you like and colour it.
- After colouring it fold it alternatively and hold it tightly at the bottom.
- Wave it. Can you feel the air?

Can you say how the candle light is put out?
Shall we make a balloon missile?
Shall we jump and catch it as it goes higher?

Watch the balloon missile as it goes higher.
Why does the balloon fly high?

Shall we float a balloon boat in water?
Isn’t it beautiful to see the boat floating?

Watch the balloon boat moving in water.....
Why does the balloon boat move forward in water?

**Do you know?**

What are the necessary things needed for the movement of cycles, two wheelers, four wheelers and aeroplanes?
2. WATER

I come as Rain!
Flow as Flood!
Gather as Pond!
Change as Lake!
Run as River!
Mingle with the sea
Transform into clouds
To return as Rain again!
I quench thirst!
Put out fire!
Clean everything!
Give electricity!
Make plants grow!
There is no life without me!
I am “Water”
I am going to talk to you! Do you know about me?

I am essential for your life
I fall on earth as rains.

When I flow into the shallow pits,
I am called Pond.

When I collect in deep,
wide places I am called Lake.

When small streams join
together, I am called River.

When all the rivers meet
together, I am called Sea.

The main source of water is Rain! There are different water sources such as Pond, Lake, River and Sea.
Shall we write in which of the water sources Shankar and Saritha are fishing....

Write whether these water sources are natural or artificial.
Shall we mention the uses of water?

To cook.....

To wash clothes....

To grow plants....

To put out fire...

Discuss with your friends, the other uses of water.
Polluted water contains disease causing germs. Drinking polluted water causes diseases. Therefore we should protect and keep water clean.

- Drinking water should be stored in clean vessels.
- Drinking water should be covered and protected from impurities.
- Drinking water should be boiled, filtered, cooled and used.
- Drinking water should not be polluted.
- Drinking water should not be wasted.
- We should save every drop of water.
- It is our duty to save water.
Observe the pictures and mark whether the following statements are right or wrong!

The discharged water comes from the factory.

The water for cultivation comes from the dam.

This water can be used for drinking.

This water should not be used for bathing.

The polluted water from the dyeing factory is coming out through the pipe.

Plastic waste is mixed with water.

Garbage should not be mixed with water.

This water can be used for agriculture.

This water cannot be used for cooking.

The pure water is coming out through the pipe.

This water can be used for washing.

In this water, crops grow well.
Why do most of the parts of the Earth look blue?

Name some of the waterfalls that you know.

_________________________  __________________________
_________________________  __________________________

Do you know?

Why do most of the parts of the Earth look blue?
In the classroom, the children were waiting eagerly to see the puppet show.

Good morning! I am Kalvarayan, made of stone. I am made of the rocks from mountains and hills. Rocks are useful to people in many forms such as granite, marble and chalk. People use me to build houses, make statues in temples, construct roads and dams.
Good Morning! I am Madhavan, made of soil. Soil is formed when the rocks rub against each other and break into very small pieces that is by the weathering of rocks. People classify soil into different types, such as gravel, sand, clay, red soil, alluvial soil, black soil etc., I am used for agriculture and to make clay vessels.

Good Morning! I am Ulaganathan. I am made of metal. I am separated from the earth crust. I am hard and shining. I exist in different forms like iron, gold, silver, aluminium, etc., People wear me as ornaments and use me to make different household articles.
Good Morning! I am Maragatham made of wood. Wood is available everywhere on earth. All living beings depend on me. I give food, shelter and clothing for living beings.

“Hey children! I make a request to you, when people cut and destroy trees rain becomes scanty and the world will turn into a desert without water. So please don’t cut us!” Saying so, she left with tears.
Colour the above pictures of articles.

- Use yellow colour for wooden articles.
- Use red colour for metal articles.
- Use black colour for stone articles.
- Use brown colour for clay articles.
### Classify:

Seashore is a long area covered by sand. The sand is made up of small particles.

- Sand in the seashore is not suitable for agriculture.
- This sand cannot be used for construction also.
Have a look at the field.

What are the activities going on there?

- Soil is seen in the field.
- This soil is suitable for agriculture.
- When water mixes with soil, marsh is formed.
- Seedlings are planted in this marshy land and agriculture is done.

Have you seen marshy land elsewhere?
Why is the temperature low in the mountainous regions even during the summer season?

Classify the pictures given below and number them

1 Sandy area 2 Marshy area.

Do you know?

Why is the temperature low in the mountainous regions even during the summer season?
Kala: What are those coloured bands in the sky?

Mala: Oh! These black clouds bring us rain.

Kala: Ah! Mala, how dark the clouds are!

Mala: These black clouds bring us rain.

Kala: What are those coloured bands in the sky?

Mala: Oh! This is the rainbow. Usually it appears just after the rain when sunlight falls on the drops of water.
Kala: The sky looks blue.
Mala: The sky appears to be blue during the day.

Kala: Can you tell me about the stars, sister?
Mala: The stars blink like fire flies. They look small as they are far away from us.

Kala: Then, why does the sky appear red early in the morning and late in the evening?
Mala: When the sun rises in the east and sets in the west, the sky appears red in colour.

The sky is always beautiful!
Sun:
The sun is a star. It is a ball of fire. It gives us light and heat.

Moon:
The moon is a satellite. It is made of rock. There are no living beings in the moon. The moon has no light of its own. It reflects the light of the sun.

Stars:
Stars are seen in the sky at night. They are either seen alone or in groups. We cannot see the stars during the day because of the strong and bright light of the sun.

Rainbow:
Rainbow is seen in the day sky during the rainy season opposite to the sun. It has seven colours.
1. In the pictures shown below, draw the things that you see in the sky during the day and at night.

Sky at day time

Sky at night time
Shall we try making a rainbow at home?

- Take a glass tumbler and fill it up with water.
- Place a piece of mirror inside the tumbler in a slanting position.
- Place the set up in direct sunlight.
- Sun light should fall on the mirror.
- What do you see on the wall?

Fill in the missing letters.

Do we know about directions?

The sun rises in the East. The sun sets in the West.

When we stand facing East …

- The left arm points the North direction.
- The right arm points the South direction.

East, West, North and South are the four directions.
Show directions for the butterfly.

When the butterfly flies from the basket of roses, in which direction does it have to fly...

- to reach the basket with white samanthi?
- to reach the basket with jasmine?
- to reach the basket with lotus?
- to reach the basket with sunflower?
Fathima must go in _________ direction to the market from her house.

From the market Fathima should go in _________ direction to the post office.

The school is located at the _________ of the post office.

The playground is located in the _________ of the school.

Fathima’s house is in the _________ direction of the playground.

What are the directions, Fathima has to take if she goes to the school through the playground?

What are the directions, Fathima has to take if she goes to the school through the post office?
Are these landmarks found in your town? In which direction are they from your house?

- From your house, towards
  - North, __________________________ is found.
  - South, __________________________ is found.
  - East, __________________________ is found.
  - West, __________________________ is found.

Draw your house and surroundings. Assume the top side of your house as north.
Draw the following in the four directions of the library.

- Tree in the East.
- Mountain in the North.
- House in the West.
- Electric post in the South.

Do you know?

How do soldiers find directions, when they are in dense forests?
