

My Parents Essay for Grade 3

MY PARENTS

© Byjus.com

Parents are the most beautiful creations of God. They are the ones who bring us to the world. They play an enormous role in our overall development - physical, mental, emotional, etc. They are responsible for inculcating good habits and etiquette in us. When we are born, we know nothing. Parents are our first teachers. They teach us to speak, to walk, to eat and to learn. They help us distinguish between the good and bad.

I am very close to my parents. They love me so much. They try to give me whatever I ask for. When I get good grades and appreciation, they feel proud. My mother helps me with my studies and my father takes care of all the things that I need to study and play. My mother cooks the tastiest food for me. My father plays with me and takes me to fairs. My parents buy me gifts and new clothes on birthdays and other occasions.

I share everything with them. They help me resolve my problems and teach me to be optimistic even in the worst of situations. I love them a lot and pray for their well-being and long life.
