

## Chapter 5 – Industries

### 1. Answer the following questions.

#### (i) What is meant by the term 'industry'?

**Answer:** Industry refers to an economic activity that is concerned with production of goods like iron and steel industry, extraction of minerals like coal mining industry and the provision of services like tourism industry.

#### (ii) Which are the main factors which influence the location of an industry?

**Answer:** Setting up an industry leads to development and growth of that location. The factors that affect the location of industries are the easy availability of raw material and land, adequate supply of water and labour, access to power and transport, presence of market and good amount of capital. Sometimes, the government also provides incentives like subsidised power, lower transport cost and other infrastructural facilities so that industries may be located in backward areas.

#### (iii) Which industry is often referred to as the backbone of modern industry and why?

**Answer:** Steel is called the backbone of modern industry because almost everything we use is either made of steel or has been made with machinery or tool made out of steel. Steel industry is basically the feeder industry whose products are the raw materials for other industries.

#### (iv) Why has the cotton textile industry rapidly expanded in Mumbai?

**Answer:** The warm and moist climate, proximity to port, easy availability of raw material and skilled labour helped in rapid expansion of the cotton textile industry in Mumbai.
