Marking Scheme Class XII Informatics Practices (Code: 065) 2014-15

Time: 3	Hrs. MM:	70
1 (a)	Draw a network layout of bus topology to connect 5 client computers and 1 server computer.	(1)
Ans:	Server Image: Constraint of the server o	
(b)	Mr. John wants to prevent unauthorized access to/from his company's local area network. Write the name of a system (software/ hardware), which he should install to do the same.	(1)
Ans:	He should install Firewall. (1 mark for correct answer)	
(c)	Which of the following are open source softwares : GNU, MS-Office, BOSS, Windows OS	(1)
Ans:	GNU, BOSS (1/2 mark for each correct answer)	
(d)	Name the government organization that contributes to the growth of FOSS in India.	(1)
Ans:	National Resource Centre for Free and Open Source Software (NRCFOSS) is the government organization that contributes to the growth of FOSS in India.	

(e)	Read the given activities carefully and mention in front of the activity whether that activity is snooping or eavesdropping:	(2)
	 i. Getting someone's login information by casually watching what he/she is typing. ii. Setting up unauthorized parallel telephone lines iii. Installing some software/hardware which captures the data while on its way. iv. Reading the files on someone's computer in an unauthorized manner. 	
Ans:	i. Snooping. ii. Eavesdropping iii. Eavesdropping. iv. Snooping. (½ mark for each correct answer)	
(d)	Kristen has typed the following text in the address bar:	(2)
	http://www.cbse-international.com/help.htm	
	Explain to her the main concept of URL and Domain name with reference to the example given above.	
Ans:	URL (Uniform Resource Locator) is the complete address of a document on the web, whereas a domain name specifies the location of document's web server. A domain name is a component of the URL used to access web sites.	
	For example the web address http://www.cbse-international.com/help.htm is a URL. In this URL www.cbse-international.com is the domain name.	
	(1 mark for differentiating between URL and domain name $\frac{1}{2}$ mark for correctly identifying url and $\frac{1}{2}$ mark for correctly identifying domain name)	
(e)	Chanakya has to write a paragraph in English on nobel laureates as a part of his holiday homework. He is using a software in which he types the text in Hindi and the software automatically converts the text into English. For example, if he types "नोबेल प्राइज इस गवेन इन सक्स कैटेगरीज" the software converts it into "Nobel Prize is	
	given in six categories". What kind of text entry is it - phonetic text entry OR keymap based text entry? How is it different from the other kind of text entry?	(2)
Ans:	It is phonetic text entry. It is different from keymap based text entry as in the keymap based text entry keyboard keys are mapped to specific characters using a keymap whereas in phonetic text entry text translation is done by some software based on probable pronunciation of the entered text. (1 mark for specifying "phonetic text entry") (1 mark for specifying correct difference)	

2	(a)	In a java program Rajat wants to use a variable to store the quantity of an item which may be in whole numbers or decimals. Write a suitable java statement to declare the variable for the above mentioned purpose.	(1)
	Ans:	He can use float or double type of variable. double num; Or float num; (1 mark for each correct declaration)	
	(b)	<pre>What will be the values of num and num1 after execution of the following code: int num,num1=0; for(num=100;num<=101;num++) { num1= num+2; num1; }</pre>	(1)
	Ans:	The value of both num and num1 will be 102. (½ mark for each correct answer)	
	(C)	Zia is working with list box. She has placed a list control on her form to display the list of all items available in her shop. She wants to allow the user to select multiple items from her list control. Which property of jList should she use to do the same?	(1)
	Ans:	She should use the selectionMode property (1 mark for correct answer)	
	(d)	<pre>Raman has typed the following code: int ch=Integer.parseInt(jTextField1.getText()); switch(ch) { case 1:jTextField2.setText("Service"); case 2: jTextField2.setText("Complaint"); case 3: jTextField2.setText("Operator"); break; default: jTextField2.setText("Not a valid entry"); } On entering the value 1, 2 or 3, he is getting the same output. Mention the possible</pre>	(1)
	A :	reason for the same.	
	Ans:	Break statement is missing after every case. (1 mark for correct answer)	
	(e)	Jennifer wants to write html code to create an ordered list starting with "c". Help her in writing the code.	(2)

	Ans:	<ol start="3" type="a"> (1 mark for OL) (½ mark for type) (½ mark for correct value of start)	
	(f)	Write any two advantages of xml over html.	(2)
	Ans:	 HTML is designed to display data and hence focused on the 'look' of the data, whereas XML is designed to describe and carry data and hence focuses on 'what data is'. In HTML tags are predefined, while in XML, tags can be created as per needs. (1 mark each for any two correct advantages) 	
	(g)	Write java code that take any three digit number from the user in jTextField1, calculate the sum of the digits and display it in separate textfield named jTextField2. For example If the number entered is 432, it should answers as 9 (i.e. 4+3+2).	(2)
	Ans :	int n=Integer.parseInt(jTextField1.getText());	
		int result=0;	
		while(n>0)	
		{	
		result = result+n%10;	
		n=n/10;	
		}	
		jTextField2.setText(""+result);	
		(1 mark for correct while loop) (½ mark for correct logic used inside while loop) (½ mark for displaying correct value)	
3	(a)	Saumya had previously created a table named 'Product' in a database using MySQL. Later on she forgot the table structure. Suggest to her the suitable MySQL command through which she can check the structure of the already created table.	(1)
	Ans:	Desc Product; OR Describe Product;	
		(1 mark for correct answer)	
	(b)	Roli wants to list the names of all the tables in her database named 'Gadgets'. Which command (s) she should use to get the desired result.	(1)
	Ans:	Show tables; (1 mark for correct answer)	

(c)		-	·	l' as shown below:		1	_	(1
		tient_No	Patient_Name	Disease	Age	Charges		
	PO		Alya	Viral Fever	14	500	_	
	PO		Kavita	Lung Infection	16	1500	_	
	PO		Manya	Cough and Cold	20	500	_	
	PO		Amar	Bone Fracture	22	2500	_	
	PO	05	Deep	Viral Fever	15	500		
			new column 'Add nand for the same	ress' in the above §	given ta	able. Sugge	st to	
Ans:	Alter table Hos	spital add	Address varchar(2	.0);				
(d)		nade in th		n a Multinational baction. Suggest to				(*
Ans:	Rollback							
(e)	What will be t	ne output	of the following q	ueries on the basis	of Emp	oloyee table	e:	(2
			++	++				
			Empld ENa	-				
			A002 Joh A003 Ton	o 5600 n NULL n 5000

			ne equivalent S e each pair in a		above (which give the same	
Ans:	Group A (i)	۰ ۱				

		(iii) Group B (ii) (iv) (½ Mark for each correct answer)	
4	(a)	Define inheritance with reference to object oriented programming.	(1)
	Ans:	Inheritance is a process of creating a new class (derived class or sub class) from existing class. The derived class not only inherits capabilities of the base class but also can add new features of their own. (1 mark for correct definition)	
	(b)	Given a String object named 'code' having value as "908" stored in it. What will be result of the following? JOptionPane.showMessageDialog(null, " " +(code.length()+ Integer.parseInt(code)));	(1)
	Ans:	911 (1 mark for correct answer)	
	(C)	What will be displayed in jTextField1 and jTextField2 after the following code is executed: int num = 35 , num1 = 46 ; jTextField1.setText(num + num1 + " ") ;	(1)
		jTextField1.setText("" + num + num1);	
	Ans:	jTextField1 81 will be displayed jTextField2 3546 will be displayed. (1 mark for each correct answer)	
	(d)	Find output of the following java code snippet: String word="Highrise";	(2)
		String wordlc = word.toLowerCase();	
		for (int i = 0; i < wordlc.length(); i+=4)	
		{	
		<pre>String extstr = wordlc.substring(i,i+2);</pre>	
		jTextArea1.append(extstr+"\n");	
		}	
	Ans:	hi ri (½ mark for each character of output)	
	(e)	Rewrite the following code using while loop: int a,b;	(2)
		for(a=10,b=4;a<=16;a++,b+=2){	

	jTextArea1.append(""+a++);}	
	JOptionPane.showMessageDialog(null,"Finished!!!");	
Ans:	int a=10,b=4;	
	while(a<=16){	
	jTextArea1.append(""+a++);	
	a++;	
	b+=2;}	
	JOptionPane.showMessageDialog(null,"Finished!!!");	
	($\frac{1}{2}$ mark for correct while statement, $\frac{1}{2}$ mark for correct increment statement and 1 mark for correct use of variables)	
(f)	The following code has error(s). Rewrite the correct code underlining all the corrections made : String str1 = SeemaSurakshabal; int b; for(int b = 0; b < 3, b++) { jTextArea1.showText(str1+"\n"); str1 = str1 + b; }	(2)
Ans:	<pre>String str1 = <u>"SeemaSurakshabal";</u> int b; for(<u>int</u> b = 0; b < 3<u>;</u> b++) { jTextArea1.<u>append(str1+"\n"); str1 = str1 + b; } (½ mark for each correct error)</u></pre>	
(g)	Ms. Rakhi works in an International Bank as an IT Head. She designed a simple interest calculator program as shown below:	(6)
	CUSTOMER NAME Ms. Jenifer DEPOSIT AMOUNT 10000 ACCOUNT TYPE ACCOUNT TYPE INTEREST RATE INTEREST RATE	
	DEPOSIT DURATION (IN YEARS) 2 SIMPLE INTEREST AMOUNT 800.0 SI CLEAR ALL	

	The interest rate is given based on the account	type as shown below:
	ACCOUNT TYPE	INTEREST RATE %
	SAVING	4 %
	RECURRING DEPOSIT	
	FIXED DEPOSIT	8 %
	i. Write the code required for 'INTEREST R	ATE' button to display interest rate
	as per the above given criteria.	on to calculate and dicplay (Simple
	ii. Write the code required for 'SI' butto Interest' based on the given formulae:	on to calculate and display simple
	SI=(amount*interest_rate*duration	۱)/100·
	iii. Write the code required for 'CLEAR ALL' t	, ,
A		
Ans :	i. Correct code required for 'INTEREST RATE' to	button to display interest rate as per
	the above given criteria:	
	if(R1.isSelected()==true)	
	T3.setText("4");	
	else if(R2.isSelected()==true)	
	T3.setText("6");	
	if(R3.isSelected()==true)	
	T3.setText("8");	
	(1 mark for using correct if statement	a suitable toxt field)
	1 mark for displaying interest rate value in the	le suitable text field)
	ii. Correct code required for 'SI' button	
	double amt=Double.parseDouble(T2.getText())	:
	double int_rate=Double.parseDouble(T3.getTex	
	<pre>int year=Integer.parseInt(T4.getText());</pre>	
	double si=(amt*int_rate*year)/100;	
	T5.setText(""+si);	
	(1 mark for fetching values in suitable variab	les
	1 mark for calculating and displaying SI)	
	iii	
	t1.setText("");	
	t2.setText("");	
	t3.setText("");	
	t4.setText("");	
	t5.setText("");	
	(1 mark for correct code)

Ans:	 i. Yes, it is possible to have primary key and foreign key column in one table. Primary key column is used to uniquely identify each record of the table while foreign key column is used to maintain referential integrity. As in the above given table 'Transaction_Detail', Trans_Id column is a primary key column while Acc_No column may act as a foreign key column. 							
	 (½ Mark for correct answer) (½ Mark for correct justification) ii. A table can have maximum one Primary Key A table can have any number of foreign Keys 							
	(½ Mark for	r each correct	answer)					
(c)	Consider the tables 'Flights' & 'Fares' given below:						(6	
	Flights							
	FNO	SOURCE	DE	ST	NO C	F_FL	NO_OF_STOP	
	IC301	MUMBAI	BA	NGALORE		3	2	
	IC799	BANGALOR		KOLKATA		8	3

		IC799	Spice Je		8846	10)	
		MC101 IC302	Deccan A		4210 13894	5		
		AM812	Jet Airw Indian A		4500	6		
		MU499	Sahara		12000	4		
	With reference to these tables, write commands in SQL for (i) and (ii) and output for (iii) below: i. To display flight number, source, airlines of those flights where fare is less							
	than Rs. 10000. ii. To count total no of Indian Airlines flights starting from various cities.							
	iii. SELECT FLIGHTS.FNO, NO_OF_FL, AIRLINES FROM FLIGHTS,FARES WHERE FLIGHTS.FNO = FARES.FNO AND SOURCE='DELHI';							
	FLIGHTS.	IIIU = FARES.	FINU AND 3	OURCE='D	ELHI';			

		and fare<10000;					
		(1 mark for correct use of select and from)					
		(1 mark for correct use of where clause)					
		ii. select sum(no_of_fl) from flights, fares where flights.fno=fares.fno group by					
		source having Airlines='Indian Airlines'; (1 mark for correct use of select and from)					
		(1 mark for correct use of where and group by clause)					
		ii. MC101 6 Deccan Airlines MU499 3 Sahara					
		(1 mark for each correct line of output)					
7	(a)		(1)				
	Ans:	A good back-end ensures sustainability, efficiency and easy modification of the					
		application. (1 <i>mark for correct answer</i>)					
	(b)	Identify e-Governance and e-Learning applications from the following: (2	(2)				
		i) On-line experiments in a virtual laboratory of a college.					
		ii) On-line application submission for change of address in the passport.					
		iii) On-line bill payment of Water Charges to Jal Board of any state.iv) On-line tutorials for physics.					
	Ans:						
	AIIS.	E_Governance: i) On-line bill payment of Water Charges to Jal Board.					
		ii) On-line application submission for change of address in the passport					
		e-Learning:					
		iii) On-line experiments in a virtual laboratory of a college.					
		iv) On-line tutorials for physics (1/2 mark for correctly identifying each application)					
	(c)		(2)				
	(-)	a form with following functions. Choose appropriate controls from Text Field,					
		Label, Radio button, Check box, List, Combo box and write in the third column:					
		Sno Control used to : Control					
		1. Enter the name					
		2. Select the department from the					
		available list					
		3. Choose type of employee					
		(Permanent / Regular)					

	4.	Display the picture of the employee
