

Economics

Time allowed: 3 hours

Maximum Marks: 80

General Instructions:

- This question paper contains two parts:
Part A - Statistics (40 marks)
Part B - Micro Economics (40 marks)
- Marks for questions are indicated against each question.
- Question No. 1-7 and Question No. 16 – 22 are 1 mark questions and are to be answered in one word/sentence.
- Question No. 8-10 and Question No. 23 – 25 are 3 marks questions and are to be answered in 60 - 80 words each.
- Question No. 11-13 and Question No. 26 – 28 are 4 marks questions and are to be answered in 80-100 words each.
- Question No. 14-15 and Question No. 29 – 30 are 6 marks questions and are to be answered in 100-150 words each.
- Answers should be brief and to the point and the above word limit be adhered to as far as possible.

Questions

Q	PART - A (STATISTICS)	Marks
1	<p>The standard deviation of 100 workers in a factory was ₹400. If each observation is multiplied by 4, then the new value of standard deviation will be:</p> <p>(a) 200 (b) 600 (c) 700 (d) 800</p> <p>OR</p> <p>_____ of dispersion are obtained as ratios or percentages of the average. These are also known as 'Coefficient of dispersion'</p>	1
2	<p>Fill in the blanks: According to _____ definition of economics is the science which studies human behavior as a relationship between ends and scarce means which have alternative uses.</p>	1

3	<p>_____ diagram are those diagrams in which only the length of the diagram is considered. It can be drawn in the form of a line or in various types of bars.</p> <p>(a) Multiple bar (b) Sub-divided bar (c) Percentage bar (d) One dimensional</p>	1
4	<p>Wholesale price index is used to measure the</p> <p>(a) Arithmetic mean (b) Geometric mean (c) Inflation (d) Appreciation</p>	1
5	<p>Which of the following is the formula of the consumer price index number of the aggregative method?</p> <p>(a)</p> $\frac{\sum p_1q_0}{\sum p_0q_0} \times 100$ <p>(b)</p> $\frac{\sum p_0q_0}{\sum p_0q_1} \times 100$ <p>(c)</p> $\frac{\sum p_1q_1}{\sum p_0q_0} \times 100$ <p>(d)</p> $\frac{\sum p_1q_1}{\sum p_1q_0} \times 100$	1
6	<p>True or False: Value of Coefficient of correlation lies between -1 and + 2.</p>	1
7	<p>Under _____ method, a questionnaire containing a number of questions related to the investigation is prepared.</p>	1
8	<p>Difference between geographical classification and chronological classification.</p>	3
9	<p>Define median and its properties. OR From the following distribution, find out the mean by direct method:</p>	3

	Marks	0-4	4-8	8-12	12-16			
	No. of students	8	16	4	2			
10	Convert the following series into 'less than' and 'more than' cumulative frequency distribution.						3	
	Daily wages (in ₹)	50 - 55	55 - 60	60 - 65	65 - 70	70 - 75		Total
	No. of workers (f)	18	12	20	14	16		80
11	Calculate median from the following data:						4	
	Age (in years)	55 - 60	50 - 55	45 - 50	40 - 45	35 - 40		
	No. of persons	14	26	42	40	28		
12	Calculate weighted Mean by weighted each price by the quantity consumed.						4	
	Food Articles	Quantity Consumed (in kg)		Price in ₹ (per kg)				
	Sugar	30		40				
	Potato	20		30				
	Onion	10		50				
	Ghee	15		20				
	Rice	50		70				
13	Find the missing value, if the mean of the series is 68.						4	
	X	40	?	80	100	120		
	f	16	20	12	8	4		
14	The mean marks of students of combined section A and B are 76. There are 120 and 80 students in section A and section B respectively . If mean marks of students in section A are 80, find out the mean marks of students in section B.						6	
15	Construct Quantity index number of 2019 from the following data by: (a) Laspeyre's method, and (b) Paasche's method.						6	
	Commodities	2018 Base Year		2019 Current Year				
		Price	Quantity	Price	Quantity			
	A	20	60	24	100			

		B	16	30	20	50	
		C	12	40	12	60	
		D	8	20	12	40	
Microeconomics							
16	Which of the following is related to microeconomics? (a) Gross domestic product (b) Employment (c) Inflation (d) Individual demand	1					1
17	What is the shape of the average revenue curve (demand curve) in perfect Competition?						1
18	_____ is the sum total of the utilities derived from the consumption of all units of a commodity. OR An _____ is a curve showing all the possible combinations of two goods that give us equal satisfaction. (a) Indifference set (b) Indifference map (c) Indifference curve (d) Budget line						1
19	True or false: _____ Budget line shows all the bundles/combinations of two commodities that a consumer can buy with the given income at a given set of prices.						1
20	_____ is that type of oligopoly market where firms make joint decisions regarding price and output.						1
21	When price falls with rise in output, then: (a) AR curve is steeper than MR curve (b) TR increases (c) MR curve is steeper than AR curve (d) AR and MR Curves coincide in a horizontal line parallel to X axis						1
22	When the price of the commodity rises, quantity demanded falls. It leads to the _____ movement of the demand curve. It is also known as _____ of demand.						1
23	Discuss the central problems of an economy. OR What is the economic problem? What gives rise to economic problems? Do all the economies face this problem?						3
24	What are monotonic preferences? Explain why is an indifference curve: (i) downward sloping from left to right and; (ii) convex						3

25	The coefficient of price elasticity of demand for a commodity is 0.2. When the price was ₹20 per unit. The quantity demanded was 80 units. If the price falls to ₹10 per unit how much will be its quantity demanded?	3																								
26	Explain the concept of movement along the demand curve.	4																								
27	<p>Differentiate between explicit cost and implicit cost. OR When labour increases by more than one unit and the difference of increase is equal. Find out the missing values:</p> <table border="1" style="width: 100%; border-collapse: collapse; margin: 10px 0;"> <thead> <tr> <th style="width: 25%;">Labour (units)</th> <th style="width: 25%;">Average Product (AP)</th> <th style="width: 25%;">Marginal Product (MP)</th> <th style="width: 25%;">Total Product (TP)</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">5</td> <td style="text-align: center;">10</td> <td style="text-align: center;">-</td> <td style="text-align: center;">-</td> </tr> <tr> <td style="text-align: center;">10</td> <td style="text-align: center;">11</td> <td style="text-align: center;">-</td> <td style="text-align: center;">-</td> </tr> <tr> <td style="text-align: center;">15</td> <td style="text-align: center;">13</td> <td style="text-align: center;">-</td> <td style="text-align: center;">-</td> </tr> <tr> <td style="text-align: center;">20</td> <td style="text-align: center;">13</td> <td style="text-align: center;">-</td> <td style="text-align: center;">-</td> </tr> <tr> <td style="text-align: center;">25</td> <td style="text-align: center;">11.8</td> <td style="text-align: center;">-</td> <td style="text-align: center;">-</td> </tr> </tbody> </table>	Labour (units)	Average Product (AP)	Marginal Product (MP)	Total Product (TP)	5	10	-	-	10	11	-	-	15	13	-	-	20	13	-	-	25	11.8	-	-	4
Labour (units)	Average Product (AP)	Marginal Product (MP)	Total Product (TP)																							
5	10	-	-																							
10	11	-	-																							
15	13	-	-																							
20	13	-	-																							
25	11.8	-	-																							
28	Explain the relationship between (i) Total revenue (TR) and Marginal revenue (MR) under perfect competition. Use diagram	4																								
29	<p>At a given price there is excess demand, explain how equilibrium level will be attained by a perfectly competitive industry. Or How is equilibrium achieved when at a given price there is excess demand? Discuss. Or When do we say there is excess demand for a commodity in the market?</p>	6																								
30	<p>Explain the following terms with the help of diagram: (a) Define price elasticity of supply (b) Explain different types of elasticity of supply.</p>	6
