***Suggestion for the subject teacher :***

1. Classes should be conducted in a natural environment outside the class, if possible, but within the school campus.
2. The practical class, if possible, should be allotted in the period and for a duration of two periods at a stretch.
3. It is desirable that by the end of the academic year an art exhibition of the works done in the year be organized internally within the school campus. School authority may arrange this in consonance with any school festival or school week at their convenience.
4. It is expected that students should submit one assignment of each activity given in the syllabus for continuous evaluation.
5. Visit art galleries, museums, historical monuments etc. if available in their locality and ask the student to submit a report about it on the basis of their personal experience.
