

Exercise 14.1

Page: 239

1. Give five examples of data that you can collect from your day-to-day life.

Solution:

Five examples from day-to-day life:

- (i) Number of students in our class.
- (ii) Number of fans in our school.
- (iii) Electricity bills of our house for last two years.
- (iv) Election results obtained from television or newspapers.
- (v) Literacy rate figures obtained from Educational Survey

2. Classify the data in Q.1 above as primary or secondary data.

Solution:

Primary data: when the information was collected by the investigator herself or himself with a definite objective in her or his mind, the data obtained is called primary data.

Primary data; (i), (ii) and (iii)

Secondary data; when the information was gathered from a source which already had the information stored, the data obtained is called secondary data

Secondary data; (iv) and (v)
