

**Q.1 Prepare a Trading Account from the following particulars for the year ended 31st March 2017**

Particulars	(₹)	Particulars	(₹)
Opening Stock	2,50,000	Purchases Returns	22,000
Purchases	7,00,000	Sales Return	36,000
Sales	18,00,000	Gas, Fuel and Power	75,000
Wages	2,06,000	Dock Charges	8,000
Carriage Inward	34,000	Factory Lighting	96,000
Carriage Outward	20,000	Office Lighting	5,000
Manufacturing Expenses	2,48,000		

Closing Stock is valued at ₹ 6,00,000.

The solution for this question is as follows:

Trading Account for the year ended March 31,2017					
Dr.			Cr.		
Particulars	Amount ₹		Particulars	Amount ₹	
Opening Stock	2,50,000		Sales	18,00,000	
Purchases	7,00,000		Less: Sales Returns	36,000	17,64,000
Less: Purchases Returns	22,000	6,78,000	Closing Stock		6,00,000
Carriage Inward	34,000				
Wages	2,06,000				
Custom Duty	15,000				
Gas, Fuel & Power	60,000				
Dock Charges	8,000				

Manufacturing Expenses	2,48,000		
Factory Lighting	96,000		
Gross Profit ( <i>Balancing Figure</i> )	7,69,000		
	23,64,000		23,64,000

**Q. 2(A)** From the following information, prepare the Trading Account for the year ended 31st March, 2017:

Adjusted Purchases ₹ 15,00,000; Sales ₹ 21,40,000; Returns Inwards ₹ 40,000; Freight and Packing ₹ 15,000; Packing Expenses on Sales ₹ 20,000; Depreciation ₹ 36,000; Factory Expenses ₹ 60,000; Closing Stock ₹ 1,20,000.

The solution for this question is as follows:

Trading Account for the year end March 31, 2017			
Dr.			Cr.
Particulars	Amount ₹	Particulars	Amount ₹
Adjusted Purchases	15,00,000	Sales	21,40,000
Freight & Packing	15,000	Less: Return Inwards	40,000
Factory Expenses	60,000		21,00,000
Gross Profit ( <i>Balancing Figure</i> )	5,25,000		
	<b>21,00,000</b>		<b>21,00,000</b>

**Note:** Since closing stock is already adjusted in purchases. Therefore, the closing stock will not be on the Credit side of Trading Account

Adjusted Purchases = Opening Stock + Net Purchases – Closing Stock

**Q.2(B) Calculate Gross Profit from the following information:**

	₹
<b>Closing Stock</b>	70,000
<b>Wages</b>	40,000
<b>Salary</b>	30,000
<b>Sales</b>	6,88,000
<b>Adjusted Purchase</b>	5,50,000

The solution for this question is as follows:

Dr.			Cr.
Particulars	Amount ₹	Particulars	Amount ₹
Adjusted Purchase	5,50,000	Sales	6,88,000
Wages	40,000		
Gross Profit ( <i>Balancing Figure</i> )	98,000		
	6,88,000		6,88,000

**Note:** Since the adjusted purchases are already given, the stocks will not be considered while calculating Gross Profit.

### Question 3(A)

Calculate cost of goods sold from the following:

	₹		₹
Opening Stock	40,000	Wages & Salaries	10,000
Net Purchases	50,000	Rent Paid	15,000
Net Sales	1,90,000	Closing Stock	15,000

The solution for this question is as follows:

Cost of Goods Sold = Opening Stock + Purchases + Direct Expenses – Closing Stock

Cost of Goods Sold = 40,000 + 50,000 + 10,000 – 15,000 = ₹ 85,000

### Question 3(B)

Ascertain cost of Goods Sold and Gross Profit from the following:

	₹
Opening Stock	32,000
Purchases	2,80,000
Direct Expenses	20,000
Indirect Expenses	45,000
Closing Stock	50,000
Sales	4,00,000
Sales Returns	8,000

The solution for this question is as follows:

Gross Profit = Net Sale - Cost of Goods Sold

Cost of Goods Sold = Opening Stock + Net Purchases + Direct Expenses – Closing Stock

Cost of Goods Sold = 32,000 + 2,80,000 + 20,000 – 50,000 = ₹ 2,82,000

Net Sale = Sales – Sales Return

= 4,00,000 – 8,000

= 3,92,000

Therefore, Gross Profit = 3,92,000 – 2,82,000

= ₹1,10,000

**Q.4 Calculate Gross Profit on the basis of the following information:**

	₹
<b>Purchases</b>	<b>6,80,000</b>
<b>Return Outwards</b>	<b>30,000</b>
<b>Carriage Inwards</b>	<b>20,000</b>
<b>Carriage Outwards</b>	<b>15,000</b>
<b>Wages</b>	<b>50,000</b>

**3/4 of the goods are sold for ₹ 6,00,000.**

The solution for this question is as follows:

Cost of Goods Sold = Opening Stock + Net Purchases + Direct Expenses – Closing Stock

Net Purchases = Purchase – Purchase Return

= 6,80,000 – 30,000 = 6,50,000

Direct Expense = Carriage Inwards + Wages

= 20,000 + 50,000 = ₹70,000

Cost of Goods Sold =  $0 + 6,50,000 + 70,000 - 0 = ₹ 7,20,000$

3/4th of the goods is sold for ₹ 6,00,000

Cost 3/4th of the sold goods =  $3/4 \times 7,20,000 = ₹ 5,40,000$

Gross Profit = Net Sale - Cost of Goods Sold

=  $6,00,000 - 5,40,000$

= 60,000

### Q.5(A) Calculate Closing Stock and Cost of Goods Sold:

**Opening Stock ₹ 5,000; Sales ₹ 16,000; Carriage Inwards ₹ 1,000; Sales Returns ₹ 1,000; Gross Profit ₹ 6,000; Purchase ₹ 10,000; Purchase Returns ₹ 900.**

The solution for this question is as follows:

Cost of Goods Sold = Net Sale – Gross Profit

=  $15,000 - 6,000 = ₹9,000$

Cost of Goods Sold = Opening Stock + Net Purchases + Direct Expenses – Closing Stock

$9,000 = 5,000 + (10,000 + 900) + 1,000 - \text{Closing Stock}$

Closing Stock =  $15,100 - 9,000$

= ₹6,100

### Q.5(B) Calculate Closing Stock from the following:

Particulars	(₹)	Particulars	(₹)
Opening Stock	38,000	Sales	3,60,000
Purchases	3,40,000	Return Inwards	5,000
Return Outwards	4,000	Gross Loss	20,000
Freight Inwards	26,000		

The solution for this question is as follows:

Cost of Goods Sold = Net Sale – Gross Profit

=  $(3,60,000 - 5,000) + 20,000 = ₹ 3,75,000$

Cost of Goods Sold = Opening Stock + Net Purchases + Direct Expenses – Closing Stock

3,75,000 = 38,000 + (3,40,000 + 4,000) + 26,000 – Closing Stock

Closing Stock = 4,00,000 – 3,75,000

= ₹25,000

**Q.6 From the following information, prepare the Trading Account for the year ended 31st March, 2017:**

	₹
<b>Cost of Goods Sold</b>	<b>12,10,000</b>
<b>Opening Stock</b>	<b>50,000</b>
<b>Closing Stock</b>	<b>80,000</b>
<b>Carriage Inwards</b>	<b>15,000</b>
<b>Sales</b>	<b>15,00,000</b>

The solution for this question is as follows:

<b>Trading Account</b>			
Dr.			Cr.
Particulars	Amount ₹	Particulars	Amount ₹
Cost of Goods Sold	12,10,000	Sales	15,00,000
Gross Profit ( <i>Balancing Figure</i> )	2,90,000		
	15,80,000		15,80,000

**Q.7(A) Calculate gross profit and cost of goods sold from the following information:**

**Net Sales ₹ 8,00,000**

**Gross Profit is 40% on Sales**

The solution for this question is as follows:

Gross Profit = 40% of sale

=  $40/100 \times 8,00,000$

= ₹ 3,20,000

Cost of Goods sold = Sales – Gross Profit

= 8,00,000 – 3,20,000

= ₹4,80,000

**Q.7(B) Calculate gross profit and cost of goods sold from the following information:**

<b>Net Sales</b>	<b>₹ 12,00,000</b>
<b>Gross Profit</b>	<b>33 ½ %</b>

The solution for this question is as follows:

Gross Profit = **33 ½ %** on sale

=  $100 / 3 \times 100 \times 12,00,000$

= 12,00,000 / 3

= ₹4,00,000

Cost of Goods sold = Sales – Gross Profit

= ₹12,00,000- ₹4,00,000

= ₹8,00,000

**Q.8 Calculate the gross profit and cost of goods sold from the following information:**

**Net Sales ₹ 9,00,000**

**Gross Profit is 20% on cost.**

The solution for this question is as follows:

Gross Profit = 20% on cost or 15th on cost

15th on cost = 16th on sales

Therefore, Gross Profit =  $16 \times 9,00,000 = ₹1,50,000$

Cost of Goods Sold = Sales – Gross Profit

=  $9,00,000 - 1,50,000$

= ₹ 7,50,000

**Q.9 Ascertain the value of the closing stock from the following:**

	₹
<b>Opening Stock</b>	<b>1,20,000</b>
<b>Purchases during the year</b>	<b>9,30,000</b>
<b>Sales during the year</b>	<b>15,60,000</b>
<b>Rate of Gross Profit</b>	<b>40% on Sales</b>

Solution:

Gross Profit = 40% on Sales

=  $(40/100) \times ₹ 15,60,000$

= ₹ 6,24,000

Cost of Goods Sold = Net Sales - Gross Profit

= ₹ 15,60,000 - ₹ 6,24,000

= ₹ 9,36,000

Cost of Goods Sold = Opening Stock + Net Purchases + Direct Expenses – Closing Stock

₹ 9,36,000 = ₹ 1,20,000 + ₹ 9,30,000 + 0 – Closing Stock

Closing Stock = ₹ 10,50,000 – ₹ 9,36,000

= ₹ 1,14,000

**Q.10 Calculate Net Sales and G.P. from the following:**

<b>Cost of Goods Sold</b>	<b>₹ 4,50,000</b>
<b>G.P.</b>	<b>25% on Sales</b>

The solution for this question is as follows:

Gross Profit = 25% on sales or  $\frac{1}{4}$ th on sales

14 on sales = 13rd on cost

Gross Profit =  $\frac{13}{14} \times 4,50,000$

= ₹ 1,50,000

Cost of Goods sold = Sales – Gross Profit

4,50,000 = Sales – 1,50,000

Sales = ₹ 6,00,000

**Q.11 Prepare Profit and Loss Account for the year ended 31st March, 2017 from the following particulars:**

Particulars	(₹)	Particulars	(₹)
General expenses	12,000	Gross profit	7,69,000
Charity	3,000	Carriage Outwards	20,000
Office Lighting	5,000	Office Expenses	16,000
Law Charges	5,800	Fire Insurance Premium	18,000
Advertisement	14,200	Telephone Expenses	13,500
Bank charges	1,200	Establishment expenses	2,500
Commission	7,000	Miscellaneous Expenses	7,100
Rent, Rates and Taxes	30,000	Discount Received	6,200
Interest on investments	12,000	Traveller's salary	60,000
Sundry Receipts	6,000	Repair	4,300
Indirect expenses	2,100	Commission Cr.	2,000
Printing and Stationery	1,500		

The solution for this question is as follows:

Profit and Loss Account for the year ended March 31, 2017			
Dr.			Cr.
Particulars	Amount ₹	Particulars	Amount ₹
General Expenses	12,000	Gross Profit	7,69,000
Charity	3,000	Interest on Investments	12,000
Office Lighting	5,000	Sundry Receipts	6,000
Law Charges	5,800	Discount Received	6,200
Advertisement	14,200	Commission Received	2,000
Bank Charges	1,200		
Commission	7,000		
Rent, Rates and Taxes	30,000		
Indirect Expenses	2,100		
Printing & Stationery	1,500		
Carriage Outwards	20,000		
Office Expenses	16,000		
Fire Insurance Premium	18,000		
Telephone Expenses	13,500		
Establishment Expenses	2,500		
Miscellaneous Expenses	7,100		
Traveller's Salary	60,000		
Repair	4,300		

Net Profit	5,72,000		
	7,95,200		7,95,200

**Q.12** Calculate the amount of gross profit, operating profit and net profit on the basis of the following balances extracted from the books of M/s Rajiv & Sons for the year ended March 31, 2017.

	₹
<b>Opening Stock</b>	<b>50,000</b>
<b>Net Sales</b>	<b>11,00,000</b>
<b>Net Purchases</b>	<b>6,00,000</b>
<b>Direct Expenses</b>	<b>60,000</b>
<b>Administration Expenses</b>	<b>45,000</b>
<b>Selling and Distribution Expenses</b>	<b>65,000</b>
<b>Loss due to Fire</b>	<b>20,000</b>
<b>Closing Stock</b>	<b>70,000</b>

The solution for this question is as follows:

Trading Account for the year ended March 31, 2017			
Dr.			Cr.
Particulars	Amount ₹	Particulars	Amount ₹
Opening Stock	50,000	Net Sales	11,00,000
Net Purchases	6,00,000	Closing Stock	70,000
Direct Expenses	60,000		
Gross Profit ( <i>Balancing Figure</i> )	4,60,000		
	11,70,000		11,70,000

Profit and Loss Account for the year ended March 31, 2017			
Dr.			Cr.
Particulars	Amount ₹	Particulars	Amount ₹
Administration Expenses	45,000	Gross Profit	4,60,000
Selling & Distribution Expenses	65,000		
Loss by Fire	20,000		
Net Profit	3,30,000		
	4,60,000		4,60,000

**Working Note:**

$$\begin{aligned} \text{Operating Profit} &= \text{Net Profit} - \text{Non-Operating Income} + \text{Non-Operating Expenses} \\ &= 3,30,000 - 0 + 20,000 \\ &= \text{Rs } 3,50,000 \end{aligned}$$

$$\begin{aligned} \text{Operating Profit} &= \text{Net Profit} - \text{Non-Operating Income} + \text{Non-Operating Expenses} \\ &= 3,30,000 - 0 + 20,000 = \text{Rs } 3,50,000 \end{aligned}$$

Since, loss by fire is a non-operating expense, therefore, it is added to the net profit to appear on the operating profit.

**Q.13 Calculate the operating profit from the following:**

	₹
<b>Net Profit</b>	<b>5,00,000</b>
<b>Dividend Received</b>	<b>6,000</b>
<b>Loss on sale of Furniture</b>	<b>12,000</b>
<b>Loss by Fire</b>	<b>50,000</b>
<b>Salaries</b>	<b>1,20,000</b>
<b>Interest on Loan from Bank</b>	<b>10,000</b>
<b>Rent Received</b>	<b>24,000</b>
<b>Donation</b>	<b>5,100</b>

The solution for this question is as follows:

Operating Profit = Net Profit – Non-Operating Income + Non-Operating Expenses

Non-Operating Income = Dividend Received + Rent Received

= ₹ 6,000 + ₹ 24,000

= ₹ 30,000

Non-Operating Expenses = Loss on Sale of Furniture + Loss by Fire + Interest on Loan + Donation

= ₹ 12,000 + ₹ 50,000 + ₹ 10,000 + ₹ 5,100

= ₹ 77,100

Operating Profit = ₹ 5,00,000 – ₹ 30,000 + ₹ 77,100

= ₹ 5,47,100

Operating Profit = Net Profit – Non-Operating Income + Non-Operating Expenses

Non-Operating Income = Dividend Received + Rent Received

= ₹ 6,000 + ₹ 24,000 = ₹ 30,000

Non-Operating Expenses = Loss on Sale of Furniture + Loss by Fire + Interest on Loan + Donation

= ₹ 12,000 + ₹ 50,000 + ₹ 10,000 + ₹ 5,100

= ₹ 77,100

Operating Profit = ₹ 5,00,000 – ₹ 30,000 + ₹ 77,100

= ₹ 5,47,100

**Note:** Salary is an operating expense and taken while evaluating net profit, so, it will not be calculated now.

**Q.14** A merchant has earned a Net Profit of ₹ 57,200 for the year ended 31st March 2017. Other balances in his Ledger are as under: -

Dr. Balances	₹	Cr. Balances	₹
Cash at Bank	4,800	Bills Payable	3,200
Cash in Hand	1,200	Creditors	61,300
Furniture and Fixtures	7,500	Loan	50,000
Debtors	80,100	Capital	3,32,300
Closing Stock	70,000		
Motor Car	40,000		
Building	1,50,000		
Plant and Machinery	1,20,000		
Bills Receivable	4,400		
Investments	20,000		
Drawings	6,000		

Prepare his Balance Sheet as at 31st March, 2017.

The solution for this question is as follows:

Trading Account				
Dr.				Cr.
Particulars		Amount ₹	Particulars	Amount ₹
Opening Stock		40,000	Sales	1,27,000
Purchases	60,000		Less: Sales Returns	1,500
Less: Purchases Returns	1,275	58,725	Closing Stock	35,000
Wages		10,000		
Freight inwards		1,000		
Gross Profit ( <i>Balancing Figure</i> )		50,775		
		1,60,500		1,60,500

Profit and Loss Account				
Dr.				Cr.
Particulars		Amount ₹	Particulars	Amount ₹
