## Practice Challenge - Subjective

## Subject: Mathematics

Topic: Circles Exam Prep 1
Class: X

1. In Fig. 8.64, PA and PB are tangents from an external point $P$ to a circle with centre O . LN touches the circle at M . Prove that $\mathrm{PL}+\mathrm{ML}=\mathrm{PN}+\mathrm{MN}$.

Fig.8.64
2. From a point P , two tangents PA and PB are drawn to a circle with centre O . If $\mathrm{OP}=$ diameter of the circle, show that $\triangle A P B$ is equilateral.
3.

If $\triangle A B C$ is isosceles with $\mathrm{AB}=\mathrm{AC}$ and $\mathrm{C}(\mathrm{O}, \mathrm{r})$ is the incircle of the $\triangle A B C$ touching $B C$ at $L$, prove that $L$ bisects $B C$.
4. Let s denotes the semi - perimeter of a $\triangle A B C$, in which $B C=a, C A=b$ and $A B=c$, if a circle touches the sides $B C, C A, A B$ at $D, E, F$ respectively prove that $B D=s-b$.
5. $A B$ is a diameter of a circle and $A C$ is the chord such that $\angle B A C=30^{\circ}$. If the tangent at $C$ intersects $A B$ extended at $D$, then $B C=B D$.

## Practice Challenge - Subjective

6. Write 'True' or 'False' and justify your answer in each of the following :
(i) The length of tangents from an external point $P$ on a circle is always greater than the radius of the circle.
(ii) The length of tangents from an external point $P$ on a circle with centre $O$ is always less than OP.
7. In figure. If $P Q R$ is the tangent to a circle at $Q$ whose centre is $O, A B$ is a chord parallel to PR and $\angle B Q R=70^{\circ}$, then $\angle \mathrm{AQB}$ is equal to

## Practice Challenge - Subjective

8. From a point $P$ which is at a distance of 13 cm from the centre $O$ of a circle of radius 5 cm , the pair of tangents $P Q$ and $P R$ to the circle is drawn. Then, the area of the quadrilateral $P Q O R$ is
