Chemistry (XL-P)

| Q. 3 | If $\boldsymbol{\theta}$ is the angle, in degrees, between the longest diagonal of the cube and <br> any one of the edges of the cube, then, $\cos \boldsymbol{\theta}=$ |
| :--- | :--- |
| (A) | $\frac{1}{2}$ |
| (B) | $\frac{1}{\sqrt{3}}$ |
| (C) | $\frac{1}{\sqrt{2}}$ |
| (D) | $\frac{\sqrt{3}}{2}$ |

| Q. 4 | If $\left(x-\frac{1}{2}\right)^{2}-\left(x-\frac{3}{2}\right)^{2}=x+2$, then the value of $x$ is: |
| ---: | :--- |
| (A) | 2 |
| (B) | 4 |
| (C) | 6 |
| (D) | 8 |

| Q. 5 | Pen : Write :: Knife : <br> Which one of the following options maintains a similar logical relation in the <br> above? |
| ---: | :--- |
| (A) | Vegetables |
| (B) | Sharp |
| (C) | Cut |
| (D) | Blunt |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay

Chemistry (XL-P)
Q. 6-Q. 10 Multiple Choice Question (MCQ), carry TWO marks each (for each wrong answer: $-2 / 3$ ).

| Q.6 | Listening to music during exercise improves exercise performance and <br> reduces discomfort. Scientists researched whether listening to music while <br> studying can help students learn better and the results were inconclusive. <br> Students who needed external stimulation for studying fared worse while <br> students who did not need any external stimulation benefited from music. <br> Which one of the following statements is the CORRECT inference of the <br> above passage? |
| :--- | :--- |
| (A) | Listening to music has no effect on learning and a positive effect on physical <br> exercise. |
| (B) | Listening to music has a clear positive effect both on physical exercise and on <br> learning. |
| (C) | Listening to music has a clear positive effect on physical exercise. Music has a <br> positive effect on learning only in some students. |
| (D) | Listening to music has a clear positive effect on learning in all students. Music <br> has a positive effect only in some students who exercise. |

Chemistry (XL-P)

| Q.10 | Six students P, Q, R, S, T and U, with distinct heights, compare their <br> heights and make the following observations. <br> Observation I: S is taller than R. <br> Observation II: Q is the shortest of all. <br> Observation III: U is taller than only one student. <br> Observation IV: T is taller than S but is not the tallest. <br> The number of students that are taller than $\mathbf{R}$ is the same as the number of <br> students shorter than |
| :--- | :--- |
| (A) | T |
| (B) | R |
| (C) | S |
| (D) | P |

## Chemistry (XL-P)

Q. 1 - Q. 2 Multiple Choice Question (MCQ), carry ONE mark each (for each wrong answer: $-1 / 3$ ).

| Q.1 | The geometry of $\mathrm{Fe}(\mathrm{CO})_{5}$ is <br> (Given: Atomic number of $\mathbf{F e}=\mathbf{2 6})$ |
| ---: | :--- |
| (A) | pentagonal planar |
| (B) | square pyramidal |
| (C) | trigonal bipyramidal |
| (D) | trigonal pyramidal |

| Q. 2 | The structure of the major product $\mathbf{Q}$ of the following reaction is |
| :---: | :---: |
| (A) |  |
| (B) |  |
| (C) |  |
| (D) |  |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay

Chemistry (XL-P)
Q. 3 - Q. 5 Numerical Answer Type (NAT), carry ONE mark each (no negative marks).

| Q. 3 | The time taken by a first order reaction to reach $90 \%$ completion is 20 s. <br> The time taken for the reaction to reach $50 \%$ completion is <br> (rounded off to the closest integer). |
| :--- | :--- |

| Q. 4 | The ground state energy of an electron in a hydrogen atom is -13.60 eV. <br> The energy of the electron in the third excited state is <br> (rounded off to two decimal places). |
| :--- | :--- |

| Q.5 | A solution of a compound shows an absorbance of 0.42 at 275 nm in a <br> cuvette with 0.1 dm light path. The molar absorptivity of the compound is <br> $\varepsilon_{275}=8.4 \times 10^{3} \mathrm{M}^{-1} \mathrm{~cm}^{-1}$. The concentration of the compound is <br> $10^{-5} \mathrm{M}$ (rounded off to the closest integer). |
| :--- | :--- |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay
Q. 6 - Q. 9 Multiple Choice Question (MCQ), carry TWO mark each (for each wrong answer: -2/3).

| Q. 6 | The CORRECT order of acidity of the following compounds is |
| :--- | :--- |
|  |  |
|  |  |
| (A) | II $>\mathbf{I}>$ III |
| (B) | II $>$ III $>$ I |
| (C) | III $>$ II $>$ I |
| (D) | III $>\mathbf{I}>$ II |

| Q. 7 | The $\mathbf{O - O}$ bond order in $\mathbf{O}_{2}{ }^{2-}$ species is |
| :--- | :--- |
| (A) | 0.5 |
| (B) | 1.0 |
| (C) | 1.5 |
| (D) | 2.0 |
|  |  |

| Q. 8 | For a reaction, $\mathrm{X} \rightarrow \text { Products }$ <br> Group I contains three plots of reactant concentrations as functions of time, where $x=$ concentration of reactant $X$ at time $t ; x_{0}=$ concentration of reactant X at initial time, $\mathbf{t}=\mathbf{0}$. Group II gives a list of different orders of reaction. Match the plots with the order of the reaction. <br> Group I <br> Group II <br> (P) <br> (1) Zero order <br> (Q) <br> (2) First order <br> (R) <br> (3) Second order |
| :---: | :---: |
| (A) | (P) - (1), (Q) - (2), (R) - (3) |
| (B) | (P) - (3), (Q) - (2), (R) - (1) |
| (C) | (P) - (2), (Q) - (3), (R) - (1) |
| (D) | (P) - (2), (Q) - (1), (R) - (3) |

Q. 10 - Q. 11 Multiple Select Question (MSQ), carry TWO mark each (no negative marks).

| Q. 10 | The CORRECT combination(s) of $Y$ and $T$ for the following elimination reaction is(are) |
| :---: | :---: |
|  |  |
| (A) | $\mathrm{Y}=\stackrel{\oplus}{\mathrm{NMe}_{3}} \text { and } \mathrm{T}=\mathrm{Me} \mathrm{Me}$ |
| (B) | $\mathrm{Y}=\stackrel{\oplus}{\mathrm{N}} \mathrm{Me}_{3} \text { and } \mathbf{T}=\mathrm{Me}$ |
| (C) | $\mathrm{Y}=\mathrm{Br}$ and $\mathbf{T}=\mathrm{Me}$ |
| (D) | $\mathrm{Y}=\mathrm{Br}$ and $\mathrm{T}=\mathrm{Me} \sim_{\mathrm{Me}}$ |

| Q. 11 | Among the following, the diamagnetic species is(are) <br> (Given: Atomic numbers of $\mathbf{F e}=\mathbf{2 6}, \mathbf{C o}=\mathbf{2 7}$, and $\mathbf{N i}=\mathbf{2 8})$ |
| :---: | :--- |
| (A) | $\left[\mathrm{CoF}_{6}\right]^{3-}$ |
| (B) | $\left[\mathrm{Ni}\left(\mathrm{H}_{2} \mathrm{O}\right)_{6}\right]^{2+}$ |
| (C) | $\left[\mathrm{Fe}(\mathrm{CN})_{6}\right]^{4-}$ |
| (D) | $\left[\mathrm{Co}\left(\mathrm{NH}_{3}\right)_{6}\right]^{3+}$ |

Q. 12 - Q. 15 Numerical Answer Type (NAT), carry TWO mark each (no negative marks).
Q. 12 Given the following standard heats of formation, $\Delta_{f} \mathbf{H}^{\ominus}(\mathbf{P}, \mathrm{g})=314.6 \mathrm{~kJ}$ $\mathrm{mol}^{-1}, \Delta_{f} \mathbf{H}^{\ominus}\left(\mathrm{PH}_{3}, \mathrm{~g}\right)=5.4 \mathrm{~kJ} \mathrm{~mol}^{-1}$, and $\Delta_{f} \mathrm{H}^{\ominus}(\mathbf{H}, \mathrm{g})=218.0 \mathrm{~kJ} \mathrm{~mol}^{-1}$, the average bond enthalpy of a $\mathrm{P}-\mathrm{H}$ bond in $\mathrm{PH}_{3}(\mathrm{~g})$ is $\qquad$ $\mathbf{k J ~ m o l}^{-1}$ (rounded off to one decimal place).
Q. 13 The total number of possible geometrical isomer(s) for $\left[\operatorname{PtBrCl}\left(\mathrm{NH}_{3}\right)(\mathrm{py})\right]^{0}$ is $\qquad$ .
(Given: py = Pyridine and atomic number of $\mathrm{Pt}=78$ )
Q. 14 Given the standard reduction potentials, $\mathrm{E}_{\mathrm{Mg}^{2+} / \mathrm{Mg}}^{\ominus}=-2.37 \mathrm{~V}$ and $\mathrm{E}_{\mathrm{Ag}^{+} / \mathrm{Ag}}^{\ominus}=\mathbf{0 . 8 0 \mathrm { V }}$, the potential of the following cell
$\mathbf{A g}^{+}(\mathrm{aq} ., \mathbf{1} \mathbf{~ m M})+\mathbf{M g}(\mathrm{s}) \rightleftharpoons \mathbf{A g}(\mathrm{s})+\mathbf{M g}^{2+}(\mathrm{aq} ., \mathbf{0 . 2} \mathbf{M})$
at $25^{\circ} \mathrm{C}$ is $\qquad$ V (rounded off to two decimal places).
(Given: Faraday constant $=96500 \mathrm{C} \mathrm{mol}^{-1}$, Gas constant $\mathrm{R}=8.314 \mathrm{~J}$ $\mathrm{K}^{-1} \mathrm{~mol}^{-1}$ )
Q. 15

The freezing point of 80 g of acetic acid (freezing point constant 3.9 K kg $\mathrm{mol}^{-1}$ ) was lowered by 7.8 K due to the addition of 20 g of a compound. The molar mass of the compound is $\qquad$ $\mathrm{g} \mathrm{mol}^{-1}$ (rounded off to closest integer).

| Q. 4 | According to the "wobble hypothesis" inosine at the third position of the <br> anticodon cannot form hydrogen bonds with <br> (A) Adenine |
| :---: | :--- |
| (B) | Cytidine |
| (C) | Guanine |
| (D) | Uracil |

| Q.5 | pKa value of the guanidinium group of Arginine is |
| :--- | :--- |
| (A) | 4.30 |
| (B) | 7.40 |
| (C) | 9.20 |
| (D) | 12.50 |

| Q.6 | The non-coenzyme vitamin is |
| :---: | :--- |
| (A) | Ascorbic acid |
| (B) | Folic acid |
| (C) | Nicotinic acid |
| (D) | Thiamine |

| Q. 7 | Telomerase has a function similar to |
| :---: | :--- |
| (A) | DNA dependent DNA polymerase |
| (B) | RNA polymerase |
| (C) | DNA gyrase |
| (D) | Reverse transcriptase | he Learning App

| Q. 8 | Which one of the following enzymes is used in Polymerase Chain Reaction ? |
| :---: | :--- |
| (A) | Klenow fragment |
| (B) | Taq polymerase |
| (C) | $T 7$ polymerase |
| (D) | Primase |

| Q. 9 | In hepatocytes, the detoxification of drugs occurs in |
| :---: | :--- |
| (A) | Golgi apparatus |
| (B) | Nucleolus |
| (C) | Rough endoplasmic reticulum |
| (D) | Smooth endoplasmic reticulum |

| Q.10 | Which one of the following antibiotics can form an ion channel in the <br> bacterial membrane? |
| :---: | :--- |
| (A) | Ampicillin |
| (B) | Gramicidin A |
| (C) | Gentamicin |
| (D) | Rifampicin |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay
Q. 11 - Q. 12 Multiple Choice Question (MCQ), carry TWO mark each (for each wrong answer: -2/3).

| Q.11 | Which one of the following cells lack hypoxanthine-guanine <br> phosphoribosyltransferase (HGPRT)? |
| :--- | :--- |
| (A) | B Cell |
| (B) | T Cell |
| (C) | Macrophage |
| (D) | Myeloma Cell |

| Q.12 | Which of the following lipids is non-ionic? |
| :---: | :--- |
| (A) | Sphingomyelin |
| (B) | Galactocerebroside |
| (C) | Lecithin |
| (D) | Phosphatidyl inositol | he Learning APP

Q. 13 - Q. 20 Multiple Select Question (MSQ), carry TWO mark each (no negative marks).

| Q.13 | Anti-B antibodies are present in the serum of |
| :---: | :--- |
| (A) | Blood group A |
| (B) | Blood group B |
| (C) | Blood group AB |
| (D) | Blood group O |

| Q.14 | Which of the following are energy requiring processes? |
| :---: | :--- |
| (A) | Facilitated diffusion |
| (B) | Active transport |
| (C) | Nonmediated transport |
| (D) | $\mathrm{Na}^{+} / \mathrm{K}^{+}$transport |

| Q.15 | Which of the following are correctly paired? |
| :---: | :--- |
| (A) | Replication: DnaA |
| (B) | Recombination: RecA |
| (C) | DNA repair: Rho factor |
| (D) | Transcription: Sigma factor |

| Q.16 | The high energy compound(s) is/are: |
| :---: | :--- |
| (A) | Phosphoenol pyruvate |
| (B) | Adenosine monophosphate |
| (C) | 1,3-Bisphosphoglycerate |
| (D) | Vitamin K |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay

Biochemistry (XL-Q)

| Q.18 | With respect to sodium dodecyl sulphate - polyacrylamide gel electrophoresis <br> (SDS-PAGE), which of these statement(s) is/are true? |
| :--- | :--- |
| (A) | Ethidium bromide is used to track the progress of electrophoretic mobility |
| (B) | $\beta$-mercaptoethanol is used to reduce disulphide bonds |
| (C) | The protein migrates towards the anode |
| (D) | The lower molecular weight protein migrates slower than the larger molecular <br> weight protein |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay

| Q.19 | In the plot given below, the solid line represents oxygen binding to hemoglobin <br> under physiological conditions. The broken line represents the condition(s) of |
| :--- | :--- |
| (A) | High $\mathrm{CO}_{2}$ concentration |
| (B) | Increase in 2,3- Bisphosphoglycerate concentration |
| (C) | High pH |
| (D) | Loss of cooperativity |

| Q.20 | Considering the open chain forms, which of the following pair(s) represent/s an <br> epimer? |
| :--- | :--- |
| (A) | D-mannose and D-fructose |
| (B) | D-glucose and D-mannose |
| (C) | D-glucose and D-fructose |
| (D) | D-galactose and D-glucose |

## Botany (XL-R)

Q. 1 - Q. 7 Multiple Choice Question (MCQ), carry ONE mark each (for each wrong answer: - 1/3).

| Q.1 | Wheat plants treated with prolonged cold temperature at the seedling stage <br> flower earlier than the untreated control. Seeds collected from these treated <br> individuals, however, give rise to plants that do not flower early. This <br> phenomenon is called |
| :--- | :--- |
| (A) | vernalization. |
| (B) | temperature acclimation. |
| (C) | photoperiodism. |
| (D) | adaptation. |

| Q. 2 | Which ONE of the following plant taxa contains vascular tissue (xylem and <br> phloem) but not woody tissue? |
| ---: | :--- |
| (A) | Oak |
| (B) | Moss |
| (C) | Pine |
| (D) | Fern |

| Q.3 | Which ONE of the following statements regarding spores and gametes is <br> CORRECT? |
| ---: | :--- |
| (A) | Spores can directly undergo mitosis whereas gametes cannot. |
| (B) | Gametes can directly undergo mitosis whereas spores cannot. |
| (C) | Neither spores nor gametes can directly undergo mitosis. |
| (D) | Both spores and gametes can directly undergo mitosis. |

## Microbiology (XL-S)

Q. 1 - Q. 5 Multiple Choice Question (MCQ), carry ONE mark each (for each wrong answer: $\mathbf{- 1 / 3}$ ).

| Q. 1 | Antonie van Leeuwenhoek observed several microscopic organisms under <br> his hand-made microscope. He described them as |
| :---: | :--- |
| (A) | Bacteria. |
| (B) | Fungi. |
| (C) | Animalcules. |
| (D) | Bacteriophages. |

| Q. 2 | Which ONE of the following pathways oxidizes 1 mole of glucose to 2 moles <br> of pyruvic acid along with one mole each of ATP, NADH and NADPH, in <br> Pseudomonas spp., but not in Bacillus spp.? |
| :---: | :--- |
| (A) | Gluconeogenesis |
| (B) | Embden-Meyerhoff Pathway (EMP) |
| (C) | Entner-Doudoroff (ED) Pathway |
| (D) | Pentose Phosphate Pathway (PPP) |

| Q.3 | Water balance in extreme halophiles such as Halobacterium is maintained <br> by cell surface glycoproteins consisting of |
| :--- | :--- |
| (A) | glycine and lysine. |
| (B) | lysine and histidine. |
| (C) | glycine. |
| (D) | aspartate and glutamate. |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay

| Q. 4 | Nocardia spp. are not amenable to the classical method of Gram staining <br> due to the presence of |
| :---: | :--- |
| (A) | N-acetyltalosaminuronic acid in the cell wall. |
| (B) | thick peptidoglycan. |
| (C) | mycolic acid. |
| (D) | keto-deoxy-octulosonic acid. |

| Q. 5 | Protists belonging to the genus Trichonympha thrive in the gut of termites. <br> They help the termites use wood as a food source. This relationship is an <br> example of |
| :---: | :--- |
| (A) | parasitism. |
| (B) | competition. |
| (C) | commensalism. |
| (D) | mutualism. | he Learning APP

Q. 6 - Q. 9 Multiple Select Question (MSQ), carry ONE mark each (no negative marks).

| Q.6 | Which of the following is/are used as electron donor/s for $\mathrm{CO}_{2}$ reduction <br> during photosynthesis in purple sulfur bacteria? |
| :---: | :--- |
| (A) | Hydrogen sulfide |
| (B) | Thiosulfates |
| (C) | Methane |
| (D) | Sulfates |

| Q.7 | Which of the following catalyze(s) substrate-level phosphorylation? |
| :---: | :--- |
| (A) | ATP synthase |
| (B) | Succinate thiokinase |
| (C) | Phosphofructokinase |
| (D) | Pyruvate kinase |

| Q.8 | Which of the following method(s) can be applied to identify a bacterial <br> species? |
| :---: | :--- |
| (A) | Fluorescent in situ hybridization (FISH) |
| (B) | Polymerase chain reaction (PCR) followed by sequencing of the amplicon |
| (C) | Gram staining |
| (D) | Acid-fast staining |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay
Q. 17 - Q. 20 Numerical Answer Type (NAT), carry TWO mark each (no negative marks).
Q. 17

The genome of a bacterium encodes for 10 different surface antigens, whose expression can be turned 'ON' or 'OFF' randomly and independently. The number of possible antigenic combinations is $\qquad$ .
Q. 18 Suppose the mRNAs in a newly discovered bacteria are composed of only two distinct nucleotides (as opposed to four found in all known organisms). Considering that the organism has no nucleotide modification systems, the number of nucleotides required per codon to encode at least 20 distinct amino acids will be $\qquad$ .

## Q. 19

The decimal reduction time $(D)$ for reducing $10^{12}$ spores of Clostridium botulinum to 1 spore at $111^{\circ} \mathrm{C}$ will be $\qquad$ min (in integer). The $D$ value is 0.2 min at $121^{\circ} \mathrm{C}$. The increase in temperature required to change $D$ to $1 / 10^{\text {th }}$ of its initial value ( $Z$ value) is $10^{\circ} \mathrm{C}$.
Q. 20

The generation time of $E$. coli is 30 minutes. For an exponentially growing culture, the initial number of bacteria required to reach a number of $10^{9}$ in 2 hours is $\qquad$ $\times 10^{7}$ (round off to two decimal places).

Zoology (XL-T)
Q. 17 - Q. 18 Multiple Select Question (MSQ), carry TWO mark each (no negative marks).

| Q. 17 | Which of the following options represent the animals as Endemic to India? |
| ---: | :--- |
| (A) | Pygmy Hog |
| (B) | Mountain Bongo |
| (C) | Hirola |
| (D) | Purple Frog |

| Q. 18 | Which of the following amino acids contain more than one chiral center? |
| ---: | :--- |
| (A) | Leucine |
| (B) | Isoleucine |
| (C) | Serine |
| (D) | Threonine |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay
Q. 19 - Q. 20 Numerical Answer Type (NAT), carry TWO mark each (no negative marks).
Q. 19 An enzyme catalyzes the conversion of $30 \mu \mathrm{M}$ of a substrate to product at reaction velocity of $9.0 \mu \mathrm{M} \mathrm{s}^{-1}$. When $\left[\mathrm{E}_{\mathrm{t}}\right]=30 \mathrm{nM}$ and $K_{\mathrm{m}}=10 \mu \mathrm{M}, K_{\text {cat }} / K_{\mathrm{m}}$ of enzyme will be $n \times 10^{7} \mathrm{M}^{-1} \mathrm{~s}^{-1}$. The value of $n$ is $\qquad$ (in integer).
Q. 20

A cross is made between two animals of genotypes $A a B b \times A a B b$, where loci $A$ and loci $B$ assort independently. The progeny of this dihybrid cross was then allowed to self-cross. The proportion of the progeny that showed segregation for loci $A$ (i.e., produce $A$ - and $a a$ progeny) in $\%$ will be (in integer).

## Food Technology XL (U)

Q. 1 - Q. 10 Multiple Choice Question (MCQ), carry ONE mark each (for each wrong answer: - 1/3).

| Q. 1 | In a typical bacterial growth curve, the first order kinetics for growth rate is <br> observed in |
| :--- | :--- |
| (A) | Lag phase |
| (B) | Log phase |
| (C) | Stationary phase |
| (D) | Decline phase |

| Q. 2 | Which of the following microorganisms is NOT a causative agent for food <br> borne diseases? |
| :--- | :--- |
| (A) | Campylobacter jejuni |
| (B) | Clostridium perfingens |
| (C) | Norovirus |
| (D) | Borrelia burgdorferi |

| Q. 3 | Which one of the followings is NOT a fermented food product? |
| ---: | :--- |
| (A) | Tofu |
| (B) | Vinegar |
| (C) | Sauerkraut |
| (D) | Tempeh |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay

Food Technology (XL-U)

| Q.4 | The Protein Efficiency Ratio (PER) is defined as |
| ---: | :--- |
| (A) | Percentage of absorbed nitrogen retained in the body |
| (B) | Weight gain in body mass (in gram) per gram protein intake |
| (C) | Ratio of essential and non-essential amino acids in a protein |
| (D) | Percent in vitro digestibility of a protein |

| Q. 5 | Which one of the following enzymes sequentially releases maltose from starch? |
| ---: | :--- |
| (A) | $\alpha$-Amylase |
| (B) | $\beta$-Amylase |
| (C) | Glucoamylase |
| (D) | Pullulanase |

| Q.6 | Highest mole \% of amino acid mixture present in glutenin of wheat gluten are |
| ---: | :--- |
| (A) | Glutamine and glutamic acid |
| (B) | Serine and lysine |
| (C) | Alanine and tryptophan |
| (D) | Proline and glycine |

| Q. 7 | Which one of the following compounds is present in soybean and acts as <br> phytoesterogen? |
| ---: | :--- |
| (A) | Tangeretin |
| (B) | Lutin |
| (C) | Quercetin |
| (D) | Genistein | he Learning App

Food Technology (XL-U)

| Q. 8 | Which one of the followings is an oligosaccharide? |
| ---: | :--- |
| (A) | Xanthan |
| (B) | Alginate |
| (C) | Raffinose |
| (D) | Gellan |

| Q. 9 | Bittering agent in grape fruit formed after juice extraction under acidic <br> conditions is |
| :--- | :--- |
| (A) | Quinine |
| (B) | Theobromine |
| (C) | Isohumulone |
| (D) | Limonin |

| Q.10 | Difference between adsorption and desorption isotherms is known as |
| ---: | :--- |
| (A) | Hysteresis |
| (B) | Dryness |
| (C) | Evaporation |
| (D) | Dehydration |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay

Food Technology (XL-U)
Q. 11 - Q. 13 Multiple Choice Question (MCQ), carry TWO mark each (for each wrong answer: - 2/3).

| Q.11 | The conversion of pyruvate to lactic acid in homolactic fermentation is <br> catalyzed by |
| ---: | :--- |
| (A) | Lactate dehydrogenase |
| (B) | Pyruvate dehydrogenase |
| (C) | Lactase |
| (D) | Pyruvate decarboxylase |

| Q.12 | Which one of the following statements is INCORRECT with respect to <br> Controlled Atmosphere Package (CAP) and Modified Atmosphere Package <br> (MAP) of agro- produce? |
| ---: | :--- |
| (A) | CAP and MAP limit microbial as well as biochemical activities. |
| (B) | Gas composition inside a MAP during the storage is continuously monitored and <br> regulated. |
| (C) | CAP implies a greater degree of precision than MAP in maintaining specific levels <br> of the gas composition. |
| (D) | Modification of the atmosphere inside a MAP is achieved by natural interplay <br> between respiration of products and permeation of gases through the packaging <br> film. |

| (D) | P-4, Q-2, R-1, S-3 |  |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay
Q. 14 - Q. 19 Multiple Select Question (MSQ), carry TWO mark each (no negative marks).

| Q.14 | Which of the followings are correct pair of GRAS chemical food preservative, <br> affected organism and given food matrix? |
| ---: | :--- |
| (A) | Sodium lactate-Bacteria-Pre-cooked meat |
| (B) | Caprylic acid-Insects-Cheese wraps |
| (C) | Dehydroacetic acid-Molds-Squash |
| (D) | Sodium nitrite-Clostridia-Meat curing preparations |

| Q.15 | Choose the correct pair of pigment and their corresponding color in plant <br> products |
| ---: | :--- |
| (A) | Carotene-Yellow-orange-Peppers |
| (B) | Betanin-Purple/red-Cactus pear |
| (C) | Lycopene-Red-Red beets |
| (D) | Flavanols-Orange-red-Cauliflowers |

| Q.16 | Which of the following compounds act as anti-nutritional factors? |
| ---: | :--- |
| (A) | Phytate |
| (B) | Isoflavones |
| (C) | Trypsin Inhibitor |
| (D) | Resveratrol |

| Q.17 | Which of the followings is/are commonly used medium/media in the <br> supercritical fluid extraction of spices and tea? |
| ---: | :--- |
| (A) | Water |
| (B) | Carbon dioxide |
| (C) | Dichloromethane |
| (D) | Carbon dioxide with Ethanol |

| Q.18 | Which of the following expressions represent the Reynolds number of a fluid <br> flowing through a uniform circular cross section pipe? |
| ---: | :--- |
| (A) | $\frac{\text { (density of the fluid) } \times \text { (average velocity of the fluid) } \times \text { (internal diamater of the pipe) }}{\text { (dynamic viscosity of the fluid) }}$ |
| (B) | $\frac{\text { (average velocity of the fluid) } \times \text { (internal diamater of the pipe) }}{\text { (kinematic viscosity of the fluid) }}$ |
| (C) | $\frac{\text { (dynamic viscosity of the fluid) }}{\text { (average velocity of the fluid) } \times \text { (density of the fluid) } \times \text { (internal diamater of the pipe) }}$ |
| (D) | $\frac{\text { (kinematic viscosity of the fluid) }}{\text { (average velocity of the fluid) } \times \text { (internal diamater of the pipe) }}$ |

| Q. 19 | Which of the following combinations of analytical equipment, property <br> measured and food property are correct? |
| ---: | :--- |
| (A) | Particle size analyzer - particle size distribution - span value |
| (B) | Texture profile analyzer - morphology - chewiness |
| (C) | Differential scanning calorimeter - glass transition temperature - degree of caking |
| (D) | Capillary viscometer - viscosity - sensory |

Graduate Aptitude Test in Engineering 2021 Organising Institute - IIT Bombay
Q. 20 Numerical Answer Type (NAT), carry TWO mark (no negative marks).
Q. 20 Dry air is fed into a tray dryer. The percentage relative humidity of the air leaving the dryer is $60 \%$ at $70^{\circ} \mathrm{C}$ and 101.35 kPa . If, saturated vapour pressure of water at $70^{\circ} \mathrm{C}$ is 31.2 kPa , the humidity of the air leaving the dryer in $\mathbf{~ k g}$ water per kg dry air (round off to 3 decimal places) will be $\qquad$ .
(Given : Molecular weight of water and air are $18.02 \mathrm{~g} \mathrm{~mol}^{-1}$ and $28.97 \mathrm{~g} \mathrm{~mol}^{-1}$ respectively)
