

**CBSE Class 10 Science Sample Paper 2023-24** 

| 3 |   | 1 |
|---|---|---|
| 5 | Mild non-corrosive basic salt is  |   |
|   | a) Ca $(OH)_2$  |   |
|   | b) NaCl   |   |
|   | c) NaOH   |   |
|   | d) NaHCO <sub>3</sub>   |   |
| 4 | <ul> <li>On adding dilute sulphuric acid to a test tube containing a metal 'X', a colourless gas is produced when a burning match stick is brought near it. Which of the following correctly represents metal 'X'?</li> <li>a) Sodium</li> <li>b) Zinc</li> <li>c) Copper</li> <li>d) Silver</li> </ul> | 1 |
| 5 | Which one of the following correctly represents Sodium oxide?   | 1 |
|   | a) $Na^{+2} 2 \begin{bmatrix} xx \\ x \\ $   | ę |
|   | c) $2 \operatorname{Na}^{+} 2 \begin{bmatrix} x \\ x$   |   |
| 6 | An element with atomic number will form a basic oxide.<br>a) 7 (2,5)<br>b) 17 (2,8,7)<br>c) 14 (2,8,4)<br>d) 11 (2,8,1)   | 1 |
| 7 |   | 1 |
| / | An element 'M' has 50% of the electrons filled in the $3^{rd}$ shell as in the 2nd shell. The atomic number of 'M' is:  |   |
|   | a) 10   |   |
|   | b) 12   |   |
|   | c) 14   |   |
|   | d) 18   |   |
| 8 | Generally food is broken and absorbed within the body of organisms. In which of the   | 1 |
|   | following organisms is it done outside the body?  |   |
|   | a) Amoeba   |   |
|   | b) Mushroom   |   |
|   | c) Paramoecium  |   |
|   | d) Lice   |   |
| 9 | Receptors are usually located in sense organs. Gustatory receptors are present in   | 1 |
|   | a) tongue   |   |
|   | b) nose   |   |
|   | c) eye  |   |
|   | d) ear  |   |
|   | 2   | 1 |

| 10 | A farmer wants to grow banana plants genetically similar enough to the plants already available in his field. Which one of the following methods would you suggest for this                      | 1 |
|----|--|---|
|    | purpose?   |   |
|    | a) Regeneration  |   |
|    | b) Budding   |   |
|    | c) Vegetative propagation  |   |
|    | d) Sexual reproduction   |   |
| 11 | Height of a plant is regulated by:   | 1 |
|    | a) DNA which is directly influenced by growth hormone.   |   |
|    | b) Genes which regulate the proteins directly.   |   |
|    | c) Growth hormones under the influence of the enzymes coded by a gene.   |   |
|    | d) Growth hormones directly under the influence a gene.  |   |
| 12 | A sportsman, after a long break of his routine exercise, suffered muscular cramps during a heavy exercise session. This happened due to:   | 1 |
|    | a) lack of carbon dioxide and formation of pyruvate.   |   |
|    | b) presence of oxygen and formation of ethanol.  |   |
|    | c) lack of oxygen and formation of lactic acid.  |   |
|    | d) lack of oxygen and formation of carbon dioxide.   |   |
| 13 | An object is placed in front of a convex mirror. Its image is formed :   | 1 |
|    | a) at a distance equal to the object distance in front of the mirror.  |   |
|    | b) at twice the distance of the object in front of the mirror.   |   |
|    | c) half the distance of the object in front of the mirror.   |   |
|    | d) behind the mirror and it's position varies according to the object distance.  |   |
| 14 | When light enters the atmosphere it strikes on extremely fine particles, which deflect the rays of light in all possible directions, This is due to -  | 1 |
|    | a) reflection of light   |   |
|    | b) atmospheric refraction  |   |
|    | c) scattering of light   |   |
|    | d) dispersion of light   |   |
| 15 | In 1987, an agreement was formulated by the United Nations Environment Programme (UNEP) to freeze the production of "X" to prevent depletion of "Y". "X" and "Y" respectively referred here are: | 1 |
|    | a) Ozone; CFCs   |   |
|    | b) CFCs; rays UV   |   |
|    | c) CFCs; Ozone   |   |
|    | d) UV rays; Diatomic oxygen  |   |
| 16 | Which of the following features relates to biodegradable substances?   | 1 |
|    | a) Broken down by biological processes   |   |
|    | b) Remain inert  |   |
|    | c) Persist in environment for long time  |   |
|    | d) May harm the ecosystem  |   |
| L  |  |   |

|    | Question No. 17 to 20 consist of two statements – Assertion (A) and Reason (R). Answer   |   |
|----|--|---|
|    | these questions selecting the appropriate option given below:  |   |
|    | a) Both A and R are true, and R is the correct explanation of A.   |   |
|    | b) Both A and R are true, and R is not the correct explanation of A.   |   |
|    | c) A is true but R is false.   |   |
|    | d) A is false but R is true.   |   |
| 17 | Assertion: Rusting of Iron is endothermic in nature.   | 1 |
|    | Reason: As the reaction is slow, the release of heat is barely evident.  |   |
| 18 | Assertion: Probability of survival of an organism produced through sexual reproduction is more than that of organism produced through asexual mode.  | 1 |
|    | Reason: Variations provide advantages to individuals for survival.   |   |
| 19 | Assertion : A compass needle is placed near a current carrying wire. The deflection of the compass needle decreases when the magnitude of the current in the wire is increased.  | 1 |
|    | Reason : The strength of a magnetic field at a point near the conductor increases on increasing the current.   |   |
| 20 | Assertion: Biodegradable substances result in the formation of compost and natural replenishment.  | 1 |
|    | Reason: It is due to breakdown of complex inorganic substances into simple organic substances.   | N |
|    | Section-B  |   |
|    | Question No. 21 to 26 are very short answer questions  |   |
| 21 | Dil. HCl is added to Zn granules." How will you prove that chemical change has taken place here? Support your response with two arguments.   | 2 |
| 22 | State the post-fertilisation changes that lead to fruit formation in plants.   | 2 |
| 23 | What is the purpose of making urine in the human body? Name the organs that stores and releases the urine.<br>OR   | 2 |
|    | Why do arteries have thick and elastic walls whereas veins have valves?  |   |
| 24 | The refractive indices of three media are given below:<br>Medium Refractive Index  | 2 |
|    | A 1.6<br>B 1.8   |   |
|    |  |   |
|    | A ray of light is travelling from A to B and another ray is travelling from B to C.  |   |
|    | (a) In which of the two cases the refracted ray bends towards the normal?  |   |
|    | (b) In which case does the speed of light increase in the second medium?   |   |
|    | Give reasons for your answer.  |   |
| 25 | A piece of wire of resistance R is cut into three equal parts. These parts are then connected<br>in parallel. If the equivalent resistance of this parallel combination is $R_1$ , what is the value<br>of the ratio $R_1 : R$ ? | 2 |
|    | OR   |   |
|    | Refer to the image below and state how the magnetic field pattern indicates regions where the magnetic field is stronger outside the magnet? What happens to the magnetic field when the current in the circuit is reversed?     |   |

|    | T magnetic field line   |   |
|----|---|---|
| 26 | Study the food chain given below and answer the questions that follow:  | 2 |
|    |   |   |
|    |   |   |
|    | Leaf  |   |
|    | Acci  | 2 |
|    | Mongoose Snake  |   |
|    | a) If the amount of energy available at the third trophic level is 100 joules, then how much energy will be available at the producer level? Justify your answer.   |   |
|    | b) Is it possible to have 2 more trophic levels in this food chain just before the fourth trophic level? Justify your answer.   |   |
|    | Section-C   |   |
|    | Question No. 27 to 33 are short answer questions  |   |
| 27 | <ul> <li>The given reaction shows one of the processes to extract the metals like Iron and Manganese.</li> <li>MnO<sub>2</sub> (s) + Al(s) → Mn(l) + Al<sub>2</sub> O<sub>3</sub> (s) + Heat</li> <li>a) Give reason why the above reaction is known as a <i>thermite reaction</i>.</li> <li>b) Identify the substance oxidised and reduced in the above reaction.</li> </ul>       | 3 |
|    | c) Give a reason why Aluminium is preferably used in thermite reactions.  |   |
| 28 | An element 'M' with electronic configuration 2 8 3 combines separately with Cl <sup>-</sup> , SO4 <sup>-2</sup><br>anions. Write the chemical formulae of the compounds formed. Predict with the suitable<br>reason the nature of the bond formed by element 'M' in general. How will the electrical<br>conductivity of the compounds formed vary with respect to 'M'?<br><b>OR</b> | 3 |
|    | A reddish-brown metal 'X', when heated in air, gives a black compound 'Y', which when heated in presence of $H_2$ gas gives 'X' back. 'X' is refined by the process of electrolysis; this refined form of 'X' is used in electrical wiring.   |   |
|    | Identify 'X' and 'Y'. Draw a well-labeled diagram to represent the process of refining 'X'.   |   |
| 29 | We are advised to take iodised salt in our diet by doctors. Justify it's importance in our body.  | 3 |

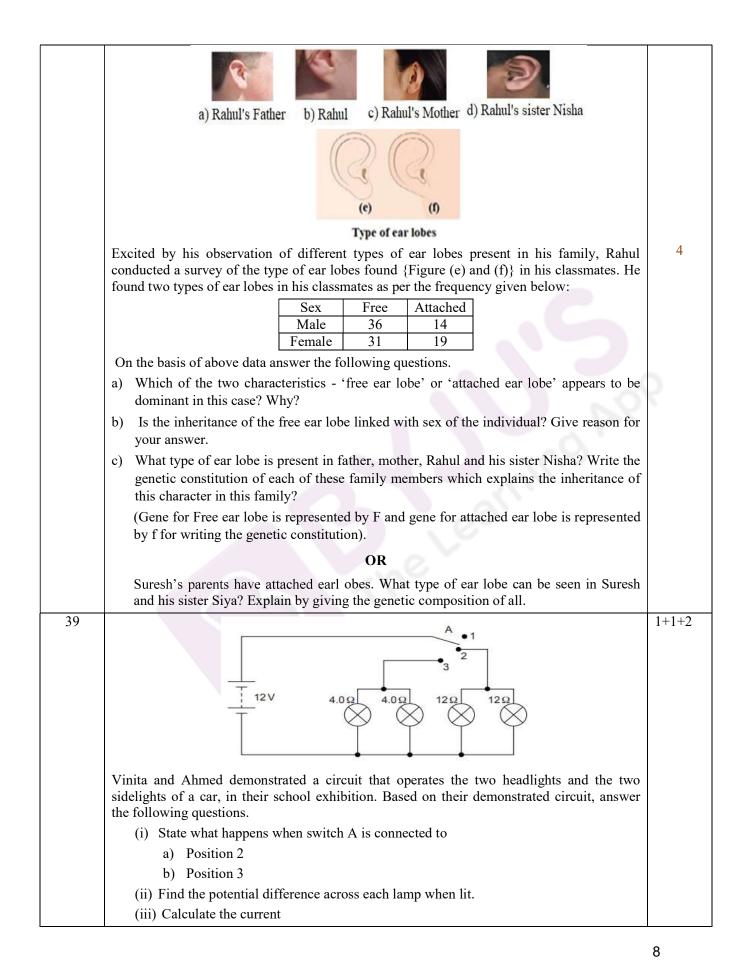

| 30 | What is the probability of a girl or a boy being born in a family? Justify your answer.   | 3     |
|----|---|-------|
| 31 | <ul> <li>(i) Explain why the refractive index of any material with respect to air is always greater 1.</li> <li>(ii) In the figure below a light ray travels from air into the semi-circular plastic block. Give a reason why the ray does not deviate at the semi-circular boundary of the plastic block.</li> </ul>   | 1+1+1 |
|    | plastic block normal  |       |
|    | (iii) Complete the ray diagram of the above scenario when the light ray comes out of the plastic block from the top flat end.   |       |
| 32 | <ul><li>(i) State the law that explains the heating effect of current with respect to the measurable properties in an electrical circuit.</li><li>(ii) List the factors on which the resistance of a conductor depends.</li></ul>   | 2+1   |
| 33 | Anannya responded to the question: Why do electrical appliances with metallic bodies are<br>connected to the mains through a three pin plug, whereas an electric bulb can be connected<br>with a two pin plug?<br>She wrote: Three pin connections reduce heating of connecting wires.<br>(i) Is her answer correct or incorrect? Justify.<br>(ii) What is the function of a fuse in a domestic circuit?  | 2+1   |
|    |   |       |
|    | Section-D   |       |
|    | Section-D<br>Question No. 34 to 36 are long answer questions.   |       |
| 34 | Question No. 34 to 36 are long answer questions.a) Rehmat classified the reaction between Methane and Chlorine in presence of sunlight as<br>a substitution reaction. Support Rehmat's view with suitable justification and illustrate<br>the reaction with the help of a balanced chemical equation.   | 5     |
| 34 | <ul> <li>Question No. 34 to 36 are long answer questions.</li> <li>a) Rehmat classified the reaction between Methane and Chlorine in presence of sunlight as a substitution reaction. Support Rehmat's view with suitable justification and illustrate the reaction with the help of a balanced chemical equation.</li> <li>b) Chlorine gas was prepared using electrolysis of brine solution. Write the chemical equation to represent the change. Identify the other products formed in the process and give one application of each.</li> </ul>  | 5     |
| 34 | <ul> <li>Question No. 34 to 36 are long answer questions.</li> <li>a) Rehmat classified the reaction between Methane and Chlorine in presence of sunlight as a substitution reaction. |    | OR   | 3+2   |
|----|--|-------|
|    | a) A doctor has advised Sameer to reduce sugar intake in his diet and do regular exercise after checking his blood test reports. Which disease do you think Sameer is suffering from? Name the hormone responsible for this disease and the organ producing the hormone. |       |
|    | b) Which hormone is present in the areas of rapid cell division in a plant and which hormone inhibits the growth?  |       |
| 36 |  | 1+2+2 |
|    | The above image shows a thin lens of focal length 5m.  |       |
|    | (i) What is the kind of lens shown in the above figure?  |       |
|    | <ul><li>(ii) If a real inverted image is to be formed by this lens at a distance of 7m from the pole, then show with calculation where should the object be placed?</li></ul>  |       |
|    | (iii) Draw a neatly labelled diagram of the image formation mentioned in (ii)  |       |
|    | OR   | 2+1+2 |
|    | A 10 cm long pencil is placed 5 cm in front of a concave mirror having a radius of curvature of 40 cm.   |       |
|    | (i) Determine the position of the image formed by this mirror.   |       |
|    | (ii) What is the size of the image?  |       |
|    | (iii)Draw a ray diagram to show the formation of the image as mentioned in the part (i).   |       |
|    | SECTION - E<br>Question No. 37 to 39 are case-based/data -based questions with 2 to 3 short sub-parts.<br>Internal choice isprovided in one of these sub-parts.  |       |
| 37 | The table given below shows the hints given by the quiz master in a quiz.  | 4     |
|    | S.NO     HINT  |       |
|    | (i) Substance 'C' is used as a preservative.   |       |
|    | (ii) 'C' has two carbon atoms; 'C' is obtained by the reaction of 'A' in presence of alkaline Potassium permanganate followed by acidification.  |       |
|    | (iii) Misuse of 'A' in industries is prevented by adding Methanol, Benzene, and pyridine to 'A'.   |       |
|    | <ul> <li>(iv) 'F' is formed on heating 'A' in presence of conc Sulphuric acid.</li> <li>(v) 'F' reacts with Hydrogen gas in presence of Nickel and Palladium catalyst.</li> </ul>  |       |
|    | Based on the above hints answer the following questions  |       |
|    | a) Give the IUPAC names of A and F   |       |
|    | b) Illustrate with the help of chemical equations the changes taking place. (A $\rightarrow$ C and A $\rightarrow$ F)  |       |
|    | OR   |       |
|    | Name the chemical reactions which occur in steps 2 and 5. Identify the compounds formed in these steps if 'A' is replaced with its next homologue.   |       |
| 38 | Figures (a) to (d) given below represent the type of ear lobes present in a family consisting of 2 children – Rahul, Nisha and their parents.  | 4     |
|    |  |       |

| a) in each 12 $\Omega$ lamp when lit.   |  |
|---|--|
| b) In each 4 $\Omega$ lamp when lit.  |  |
| OR  |  |
| (iv) Show, with calculations, which type of lamp, 4.0 $\Omega$ or 12 $\Omega$ , has the higher power. |  |
