## ULTA PULTA TIME

## Question 1:

As the sun sets $\qquad$ , Sumana wakes up. What a lovely evening! $\qquad$ She washes her face fast in 2 hours $\qquad$ and runs out. She goes straight to the bird's nest. She has been watching the eggs for the last few months $\qquad$ . She was waiting for the baby birds to come out. But before she can blink her eyes, in a week $\qquad$ a cat jumps onto the tree. The mother bird cries loudly, and Sumana rushes to shoo away the cat. As the cat jumps, it hits the big green mango. Dhum!
... In two days $\qquad$ , it is on the ground! Oh, how sad! The mango is still not fully ripe. It needed one more year $\qquad$ to become sweet. Suddenly Sumana's sister calls out - Are you still not hungry? Has your stomach clock gone to sleep? Come and eat hot upma for dinner $\qquad$ -.

## Answer:

As the sun sets rises, Sumana wakes up. What a lovely evening! morning. She washes her face fast in 2 hours minutes and runs out. She goes straight to the bird's nest. She has been watching the eggs for the last few months days. She was waiting for the baby birds to come out. But before she can blink her eyes, in a week moment a cat jumps onto the tree. The mother bird cries loudly, and Sumana rushes to shoo away the cat. As the cat jumps, it hits the big green mango. Dhum!
... In two days seconds, it is on the ground! Oh, how sad! The mango is still not fully ripe. It needed one more year week to become sweet. Suddenly Sumana's sister calls out - Are you still not hungry? Has your stomach clock gone to sleep? Come and eat hot upma for dinner breakfast.

## HOW LONG DOES IT TAKE?

Question:

| Takes minutes | Takes hours | Takes days |
| :--- | :--- | :--- |
| a bath | to stitch a shirt | to knit a sweater |
| to boil milk | to set curd | to weave a sari |
|  |  | for a banana to become ripe |
|  |  |  |
|  |  |  |

## Answer:

| Takes minutes | Takes hours | Takes days |
| :--- | :--- | :--- |
| A bath | To stitch a shirt | To knit a sweater |
| To boil milk | To set curd | To weave a sari |
| To take a glass of water | A school day | For a banana to become ripe |
| To prepare rice | To make a painting | To construct a room |
| To make popcorns | To prepare curry | Transformation of a seed into a plant |
| To blow up a balloon | To prepare curd | For a mango to get ripe |
| To prepare tea | To make sprouts | To paint a 1 BHK flat |
| To eat oranges | To prepare cake |  |

CLAP! CLAP! - BEFORE YOU CATCH

## Question:

How many of you can speak and stamp at the same time?

## Answer:

I think most of us can speak and stamp at the same time.

## HOW OLD ARE WE?

Question:
Irfan's mother is twice as old as him.
She is also 20 years older than him.
Guess the ages of Irfan and his mother.

## Answer:

Irfan's age is 20 years. His mother's age is 40 years.

## BIRTH CERTIFICATE

## Question:

(1) $2 / 5 / 2002$ shows that Bincy was born on 2 $\qquad$ , in the year 2002 .
(2) How old will Bincy be on 2 May 2008? $\qquad$
(3) How old will she be in the year 2052? $\qquad$
(4) On what date will she be eight years old? Write in numbers. $\qquad$
(5) How many months old was Bincy on 2 August 2002? $\qquad$
(6) How many years old is Bincy now? $\qquad$
(7) After how many months of her birth was the certificate issued? $\qquad$
(8) What is the registration number of her certificate? $\qquad$
Answer:
(1) 2/5/2002 shows that Bincy was born on 2 May, in the year 2002.
(2) How old will Bincy be on 2 May 2008? 6 years
(3) How old will she be in the year 2052? 50 years
(4) On what date will she be eight years old? Write in numbers. $2^{\text {nd }}$ May 2010
(5) How many months old was Bincy on 2 August 2002? 3 months
(6) How many years old is Bincy now? $\mathbf{1 7}$ years (considering the present year, 2019)
(7) After how many months of her birth was the certificate issued? $\mathbf{3}$ months and $\mathbf{3}$ days
(8) What is the registration number of her certificate? $8 \mathbf{8 1 5} / \mathbf{0 2}$

## CALENDAR

## Question:

Let us look at the calendar for the year 2018.

1. How many months does a year have?
2. List the months which have 30 days.
3. List the months which have 31 days.
4. How many days does the month of February have?
5. How many days make a week?
6. How many weeks are there in July? Is it true for all the months?
7. In which month did you come to Class III?
8. Make a circle on these dates in the calendar.

26th January
14th November

31st December

Is there something special about these dates?

Answer:

1. 12
2. 4 months (April, June, September, November)
3. 7 months (January, March, May, July, August, October, December)
4. 28 days in 2018
5. 7 days make a week.
6. 4 weeks, yes, it is true for all the months.
7. April
8. Do as instructed. Yes, $26^{\text {th }}$ January is celebrated as Republic Day, $14^{\text {th }}$ November is celebrated as Children's Day, and 31st December marks New Year's Eve.
Question:
Fill in the blanks with the correct year.
Answer:
9. Which year was it two years back? 2017
10. In which year were you in Class II? 2018
11. Which year will be the next year? 2020
12. Which year will come after 3 years? 2022

## WHICH FESTIVAL COMES FIRST?

## Question 1:

Given below are some festivals we celebrate during the year.
Look at the calendar (2018) to find the days on which these fall.

## Answer:

Considering the calendar 2018,

| Name of the festival | Date | Day |
| :--- | :--- | :--- |
| Diwali | November 7 | Wednesday |
| Pongall | January 14 | Sunday |
| Raksha Bandhan | August 26 | Sunday |
| Gandhi Jayanti | October 2 | Tuesday |
| Milad-Ul-Nabi | November 21 | Wednesday |
| Onam | August 25 | Saturday |
| Guru Nanak's Birthday | November 23 | Friday |
| Guru Ravidas's Birthday | January 31 | Wednesday |
| Christmas Day | December 25 | Tuesday |
| Bihu | April 15 | Sunday |

## Question 2:

Arrange the festivals in the order in which they come in the year.
Answer:

Pongal, Guru Ravidas's Birthday, Bihu, Onam, Raksha Bandhan, Gandhi Jayanti, Diwali, Milad-Ul-Nabi, Guru Nanak's Birthday, Christmas Day.

Question 3:

Which festival comes at the beginning of the year?

## Answer:

## Pongal

## Question 4:

Which festival comes at the end of the year?
Answer:

Christmas

## CALENDAR MAGIC

## Question:

Which is the number in the centre of the square?
Answer:

13

Question:

How many such lines can you draw?

## Answer:

Four such lines can be drawn.

## Question:

Add the three numbers on each of these lines. What do you notice?
Answer:
$5+13+21=39$
$6+13+20=39$
$19+13+7=39$
$12+13+14=39$
The sum of the numbers in each of the lines is 39 .
Question:
Now, look at the calendar of 2018. Also, look for the present month and draw any similar square in your notebook. Does the magic work for these?

## Answer:

For the month of November 2018,

$6+14+22=42$
$8+14+20=42$
$7+14+21=42$
$13+14+15=42$
The sum is the same, i.e., 42 . The magic works here as well.
Question:
Is this magic possible on a $10 \times 10$ number chart? Go to the chapter 'Fun with Numbers' and check.

Answer:

Let's check with a $10 \times 10$ number chart.
Yes, the magic works in a $10 \times 10$ number chart, also.
The cross lines- $1+12+23+\ldots+89+100=505$
and $10+19+28+\ldots+82+91=505$
As there is no middle line, we have to get an average sum of both horizontal lines.
$5+15+25+\ldots+95$ and $6+16+26+\ldots 96=505$
The average sum of both vertical lines.
$41+42+43+\ldots+50$ and $51+52+53+\ldots+60=505$.
Thus, the magic works here as well.

## COMPLETE THE CALENDAR FOR AUGUST 2018

Question:

1. Colour all the Sundays in red.
2. On which day does this month end?
3. Write the number of days in this month.
4. What day is it on 13th August?
5. What is the date on the second Saturday?
6. Is the 21 st a Sunday?
7. What is the day of the 29 th? What will be the date on the same day next week?
8. How many Thursdays are there in this month?

## Answer:

| Sounday | Menday | Tueday | Wedmestay | Thurata | Friday | 2aved |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1 | 2 | 3 | 4 |
| 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 12 | 13 | 14 | 15 | 16 | 17 | 18 |
| - 19 | 20 | 21 | 22 | 23 | 24 | 25 |
| $\frac{3}{26}$ | 27 | 28 | 29 | 30 | 31 | ) |

1. The month ends on a Friday.
2. 31
3. Monday
4. $11^{\text {th }}$ August
5. No, $21^{\text {st }}$ is a Tuesday
6. Wednesday, $5^{\text {th }}$ September
7. 5 Thursdays

## Question:

1. Which months in the calendar (2018) have 5 Sundays?
2. Is there any other day in any month which comes 5 times?
3. Can there be 6 Sundays in a month? Why?

## Answer:

1. April, July, September, and December.
2. Yes, there are days which come 5 times. For instance, there are 5 Fridays and 5 Saturdays in the month of June.
3. No, there can't be 6 Sundays in a month. There can be at max 5 weeks in a month.

## THE TRUE STORY OF PEDKI DEVI

Here is the final timeline.

## Question:

Mark on the timeline when she was born.

Answer:

## Question:

In the blank box, draw a picture of Pedki as a newborn baby.

## Answer:

Do as directed.
Question:
Make your own timeline. Ask people around you and mark at least one thing that happened in each year of your life.
Answer:
Do as directed.
Question:
Make timelines of people you admire. These can be from among your family, friends, teachers, etc.
Answer:
Do as directed.
ONE DAY IN THE LIFE OF KUSUM
Question:
Write down the time for each picture.
For some pictures, the time is already written, and you must draw your hands on the clock. In others, you have to write the time shown by the clock.

Answer:

Kusum gets up early in the morning.

She brings water
from the well.

She cleans her house.

She goes to school.

At eighto'clock

She is studying in school.

She comes back from school.

She takes lunch with her brother and grandmother.

She plays with her friends.

She listers to a story from her grandmother before she sleeps.

At $100^{\prime}$ clock in the morning
$10^{\prime}$ clock in the aftarnoon

At $20^{\prime}$ clock in the evening

Five-thirty in the evering
$90^{\circ}$ clock at right
