

# Friday Funday

General Knowledge | Brain Teasers | Comprehension Exercises

**Hello young learners!**

**I am Mila from Disney.BYJU'S Early Learn App, where I share all my adventures in Ordinary County!**

**Do you know that I have a secret? Not even my brother, Ezra, knows about it!**

**I am also a superhero who goes by the name Kid Inc. I wear a badge that glows and alerts me whenever there is any trouble!**

**But when I am back to being Mila, I read books, explore the world, and do my homework, just like you! Would you like to help me finish it?**

**You can also join Miss Mala, Miss Meridiem, and Officer Michael for other fun learning activities!**

**Let's go!**

# ACTIVITY 1

Across the Solar System with Mila

• **Earth**

Type: Rocky Planet  
Length of a year: 365.26 days  
Size (diameter): 12,742 km

Scientists believe Earth formed 10-20 million years ago. Except for Earth, all other planets are named after Greek and Roman deities. The name Earth is Germanic and means 'ground'!

Our planet, Earth, is the third one in line from the Sun. Did you know that sunlight takes about 8 minutes to reach the Earth? It makes one trip around the Sun every 365 days and 6 hours. To make up for the extra 6 hours, a leap day is added to our calendar year every 4 years.

Our Earth, the green planet, is the only planet that we are absolutely sure hosts life at present. Earth is the Solar System's fifth-largest planet. It is the only known planet to have stable bodies of liquid water on its surface for extended periods of time. Did you know that water covers 70 per cent of the planet's surface?

The Earth's atmosphere consists of 78% nitrogen, 21% oxygen, and small traces of other gases, such as carbon dioxide and hydrogen. Our atmosphere is designed to protect us from meteoroids that may be moving in our way because the vast majority of them disintegrate in our atmosphere before reaching the Earth's surface.

**Meteor (noun)** – A space rock that leaves a bright trail across the night sky as it falls through the Earth's atmosphere and burns up.

**Disintegrate (verb)** – To break into small pieces, come apart, and be destroyed

Earth is made up of complex, interconnected systems that are constantly changing. There is still a lot we don't know about Earth. And this is where satellites are helpful. They collect data on the weather, oceans, soil, crops, and more to help us understand our beautiful planet better.

**Satellite (noun)** – An electronic device that travels around the Earth or another planet in space. It's used for radio, TV, and information gathering.

# ACTIVITY 5

Fun with Ezra

**Instruction:** Spot five differences between the two images given below

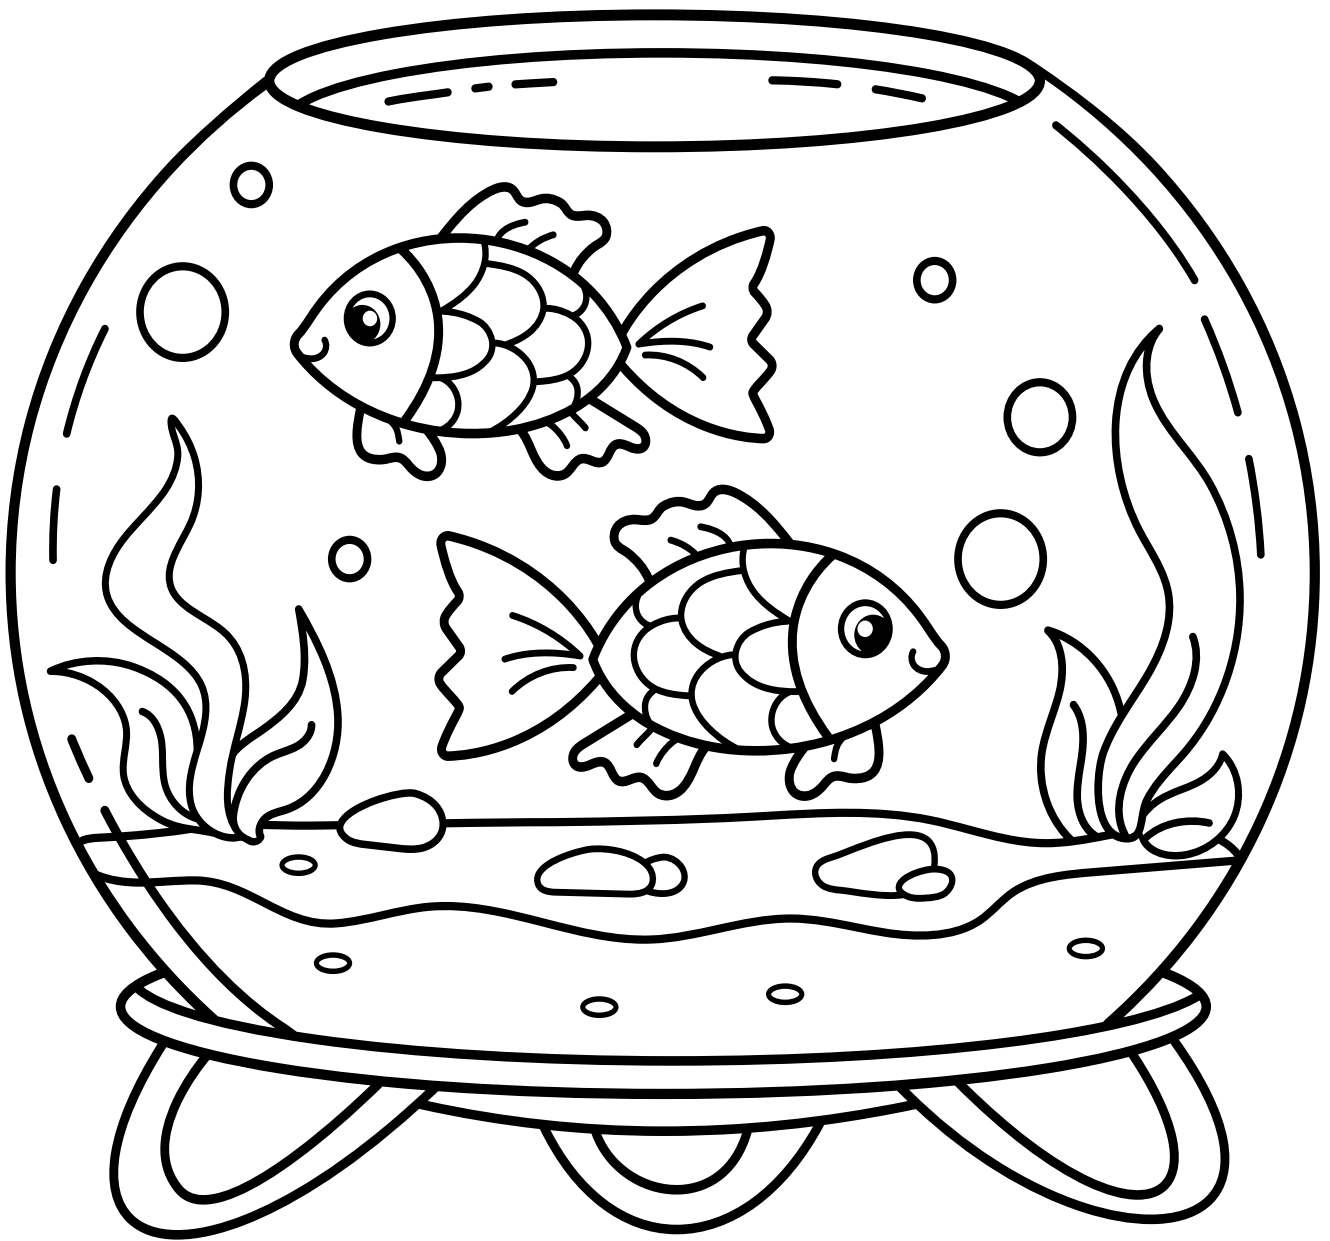

**Instruction:** Spot ten differences between the two images given below

**Instruction:** Fill this image with your favourite colours

# BONUS STICKERS

# SOLUTIONS

## ACTIVITY 1

---

1. a. 4

2. b. False

3. c. Both A & B

4. a. True

5. b. 8

## ACTIVITY 2

---

1. Heard

2. Hear

3. Listen

4. Hear

5. Listen to

# SOLUTIONS

## ACTIVITY 3

1. A.

2.

## ACTIVITY 4

1. c. Need more information

Need more information. We only know that there are many stores near Sara's house, which can be in either city or village. We need to know more about the place like size, population, economy of where Sara lives to be sure that she lives in a big city.

2. d. All of the above

3. Pownf

Pownf - Starts with P and does not end with Q  
 Gideh - Starts with G and ends with H  
 Chipd - Starts with C and ends with D  
 Objep - Starts with O and ends with P

4. a. Independent

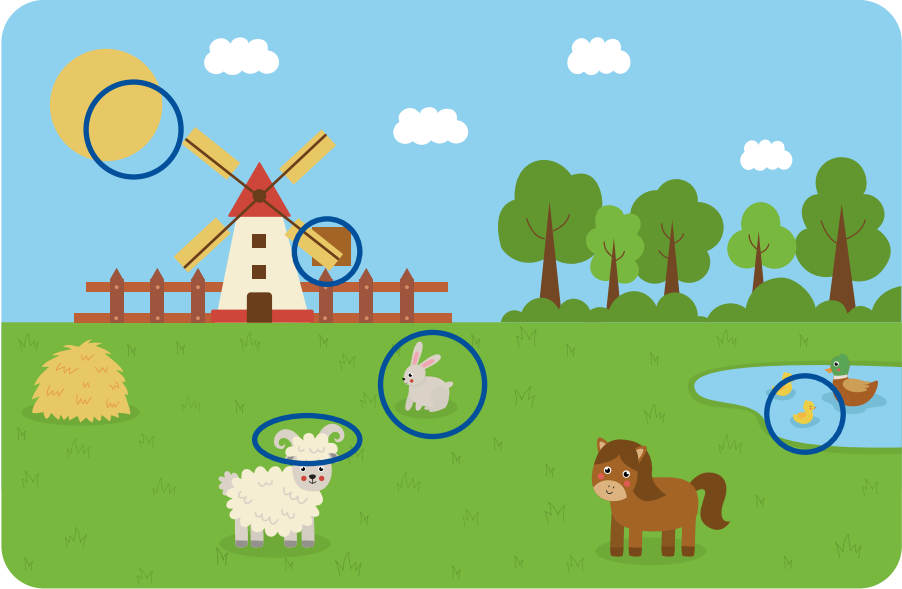

5. danced
